To the Honorable Commissioner of Patents

100853853

checked original documents or copy thereof.

1. Name of conveying party(ies): MRO 5-5-98
Zenith Electronics Corporation

Additional name(s) of conveying party(ies) attached? Yes No

2. Name and address of receiving party(ies)

Name: LG Electronics Inc.

Internal Address: _____

Street Address: 20 Yoido-dong,
Youngdunpo-ku

City: Seoul Country: Korea State: Korea ZIP: 150-721

Additional name(s) & address(es) attached? Yes No

3. Nature of conveyance:

Assignment Merger

Security Agreement Change of Name

Other Patent Collateral Assignment and Security Agreement

Execution Date: April 29, 1998

4. Application number(s) or patent number(s):

If this document is being filed together with a new application, the execution date of the application is: _____

A. Patent Application No.(s) _____ B. Patent No.(s) _____

Additional numbers attached? Yes No

5. Name and address of party to whom correspondence concerning document should be mailed:

Name: Laura Konrath

Internal Address: Winston & Strawn
33rd Floor

Street Address: 35 W. Wacker

City: Chicago State: IL ZIP: 60601

6. Total number of applications and patents involved: 132

7. Total fee (37 CFR 3.41).....\$ 5280.00

PATENT COLLATERAL ASSIGNMENT
AND SECURITY AGREEMENT

This PATENT COLLATERAL ASSIGNMENT AND SECURITY AGREEMENT (this "Assignment"), made as of this 31st day of March, 1998, by ZENITH ELECTRONICS CORPORATION, a Delaware corporation, having its chief executive office at 1000 Milwaukee Avenue, Glenview, Illinois 60025 ("Assignor") in favor of LG ELECTRONICS INC., having its chief executive office at 20 Yoido-dong, Youngdungpo-ku, Seoul 150-721 Korea ("Assignee").

WHEREAS, Assignor and Citicorp North America, Inc., a Delaware corporation, as agent (the "Agent") for itself and on behalf of the Issuing Bank and the Lenders described below, have entered into that certain Patent Collateral Assignment and Security Agreement dated as of March 31, 1998 (as amended, modified or supplemented from time to time, the "Credit Patent Collateral Security Agreement");

WHEREAS, Assignor, the Agent, the Issuing Bank and the various Lenders signatory thereto are parties to that certain Credit Agreement dated as of March 31, 1997 (as amended, modified or supplemented from time to time, the "Credit Agreement");

WHEREAS, Assignor and Assignee are parties to that certain Note Agreement dated as of March 31, 1998 (as amended, modified or supplemented from time to time, the "Note Agreement"), pursuant to which Assignee has agreed to make Advances (as defined in the Note Agreement) to Assignor;

WHEREAS, all Advances, liabilities, obligations and covenants arising from time to time under the Note Agreement owing by Assignor to Assignee, shall be referred to collectively as the "Note Obligations";

WHEREAS, in consideration for, among other things, Assignee's execution of the Note Agreement, and to secure the payment and performance of the Note Obligations Assignor has agreed to grant to Assignee a security interest in certain of Assignor's assets, including, without limitation, the HDTV Patents (as hereinafter defined); and

WHEREAS, Assignee and the Agent have entered into a Subordination Agreement dated as of November 3, 1997 (as amended, modified or supplemented from time to time, the "Subordination Agreement") relating to the respective rights and interests of Assignee and the Agent in, and to, the Collateral (as defined in the Subordination Agreement).

NOW, THEREFORE, in consideration of the premises set forth herein and for other good and valuable consideration, the receipt

and sufficiency of which is hereby acknowledged, Assignor agrees as follows:

1. Definitions. Terms used herein which are defined in the Note Agreement shall have the respective meanings set forth in the Note Agreement unless otherwise defined herein.

2. Assignment and Grant of Security. To secure the complete and timely payment of all the Note Obligations of Assignor, now or hereafter existing from time to time, Assignor hereby pledges and collaterally assigns to Assignee, a security interest in, Assignor's entire right, title and interest in and to all United States patents and patent applications for VSB technology or relating to and used in connection with the high definition television technology of Assignor (collectively, the "HDTV Patents"), including, without limitation, each patent and patent application listed on Schedule A attached hereto, and all future United States HDTV Patents and patent applications of Assignor, including all proceeds thereof, the right (but not the obligation) to sue for past, present and future infringements in the name of Assignor or in the name of Assignee, all rights (but not obligations) corresponding thereto and all reissues, divisions, continuations, renewals, extensions and continuations-in-part thereof (it being understood and agreed that the HDTV Patents assigned hereby shall include, without limitation, rights and interests pursuant to licensing or other contracts in favor of Assignor pertaining to the HDTV Patents, but in the case of third parties which are not Affiliates (as defined in the Credit Agreement) of Assignor, only to the extent permitted by such licensing or other contracts and, if not so permitted, only with the consent of such third parties).

3. Representations and Warranties. Assignor covenants and warrants as follows:

(a) A true and complete list of all HDTV Patents in existence as of the date hereof is set forth in Schedule A hereto.

(b) The HDTV Patents are subsisting and have not been adjudged invalid or unenforceable and Assignor is not aware of any claim by any third party that the HDTV Patents are invalid or unenforceable.

(c) To the best of Assignor's knowledge, each of the HDTV Patents is valid and enforceable.

(d) No claim has been made that the practice of any of the HDTV Patents does or may violate the rights of any third person.

(e) Assignor is the legal and beneficial owner of the HDTV Patents free and clear of any Lien, security interest, charge or encumbrance, including, without limitation, pledges, assignments, licenses, shop rights and covenants by Assignor not to sue third persons, except for the security interest and assignment created by this Assignment, the senior security interest and assignment created by the Credit Patent Collateral Security Agreement, and the license agreements set forth on Schedule B attached hereto (the "Existing License Agreements"). No effective financing statement or other instrument similar in effect covering all or any part of the HDTV Patents is on file in any recording office, except such as may have been filed in favor of the Agent relating to the Credit Patent Collateral Security Agreement and of Assignee relating to this Assignment or for which duly executed termination statements have been recorded or delivered to Assignee.

(f) This Assignment shall create in favor of Assignee a valid and perfected security interest in the HDTV Patents upon making the filings referred to in clause (g) below, free and clear of all Liens other than the Senior Lien in favor of the Agent under the Credit Patent Collateral Security Agreement

(g) Except for the filing of financing statements with the Secretary of State of Illinois under the UCC and filings with the United States Patent and Trademark Office, no authorization, approval or other action by, and no notice to or filing with, any governmental authority or regulatory body is required either (i) for the grant by Assignor of the security interest granted hereby or for the execution, delivery or performance of this Assignment by Assignor or (ii) for the perfection of or the exercise by Assignee of its rights and remedies hereunder to the HDTV Patents in the United States of America.

(h) The chief executive office of Assignor is located at the address set forth above for Assignor.

(i) None of Assignor's Affiliates or Subsidiaries (as defined in the Credit Agreement) has any right, title or interest in any HDTV Patents.

4. New HDTV Patents and Applications. If, at any time during the term of the Note Agreement, Assignor shall become entitled to the benefit of any patent application or patent for any reissue, division, continuation, renewal, extension or continuation-in-part of any HDTV Patent or any improvement on any HDTV Patent, the provisions of this Assignment shall automatically apply thereto. With respect to all of the

foregoing rights or benefits, Assignor shall give to Assignee prompt notice thereof in writing.

5. Assignor's Covenants. On a continuing basis, Assignor shall make, execute, acknowledge and deliver, and file and record in the proper filing and recording places, all such instruments, including, without limitation, appropriate financing and continuation statements and security agreements, and take all such action as may reasonably be deemed necessary or advisable by Assignee to carry out the intent and purposes of this Assignment, or for assuring and confirming to Assignee the grant or perfection of a security interest in all HDTV Patents. Without limiting the generality of the foregoing sentence, Assignor (i) shall not enter into any agreement which would materially impair or conflict with Assignor's obligations hereunder without Assignee's prior written consent (which consent shall not be unreasonably withheld); (ii) upon the written request of Assignee, shall use reasonable efforts to obtain any necessary consents of third parties to the grant or perfection of a security interest to Assignee with respect to the HDTV Patents; (iii) shall, from time to time, upon Assignee's reasonable request, cause its books and records to be marked with such legends or segregated in such manner as Assignee may reasonably specify, and take or cause to be taken such other action and adopt such procedures as Assignee may reasonably specify to give notice of or to perfect the security interest in the HDTV Patents intended to be created hereby; (iv) shall at all times keep at least one complete set of its records concerning substantially all of the HDTV Patents at its chief executive office or principal place of business as set forth above and shall not change the location of its chief executive office or such records without giving Assignee at least thirty (30) days' prior written notice thereof; (v) shall promptly, following its becoming aware thereof, notify Assignee of the institution of, or any adverse determination in, any proceeding in the United States Patent and Trademark Office or any United States or foreign court regarding Assignee's claim of ownership in any of the HDTV Patents; (vi) shall not permit the inclusion in any contract to which it becomes a party of any provisions which would impair or prevent the creation of a security interest in Assignor's rights and interest acquired under such contracts in any property included within the definition of the HDTV Patents; (vii) shall properly maintain and care for the HDTV Patents; (viii) shall not grant any security interest in any HDTV Patent except in the name of the Agent or in the name of Assignee; (ix) except as permitted under the Credit Agreement and herein, shall not sell or contract for sale or otherwise dispose of any HDTV Patent; (x) except with the consent of the Assignee, which consent shall not be unreasonably withheld, shall not license any HDTV Patent other than pursuant to the Existing License Agreements; (xi) upon any officer of Assignor obtaining knowledge thereof, shall promptly notify Assignee of any event which materially adversely affects

the value of any HDTV Patent, the ability of Assignor or Assignee to dispose of any of the HDTV Patents or the rights and remedies of Assignee in relation thereto including, without limitation, the levy of any legal process against any of the HDTV Patents; (xii) until Assignee exercises its rights to make collection, shall diligently keep reasonable records respecting the HDTV Patents; (xiii) shall promptly notify Assignee of any suspected infringement of any of the HDTV Patents by any third party and of all steps, including the commencement and course of litigation, taken to remedy such infringement; (xiv) shall apply proper statutory patent notice to all products covered by the HDTV Patents, and (xv) shall not terminate any Existing License Agreement or amend, modify or waive any provision of any Existing License Agreement in any manner that could reasonably be deemed to be materially adverse to the interests of Assignee, without the prior written consent of the Assignee.

6. Amounts Payable in Respect of the HDTV Patents.

Except as otherwise provided in this Section 6 or in the Credit Agreement, Assignor shall continue to collect, at its own expense, all amounts due or to become due to Assignor in respect of the HDTV Patents. Upon the occurrence and during the continuance of an Event of Default (as defined in the Note Agreement) (herein called a "Default"), Assignee is hereby given full power and authority, without notice or demand, (i) to notify any and all obligors with respect to any HDTV Patent which Assignor, except for the execution hereof, could ask for, and (ii) to demand, take, collect, sue for and receive for its own use all amounts due or to become due Assignor in respect of the HDTV Patents, and in connection therewith to enforce all rights and remedies with respect to any HDTV Patent which Assignor could enforce if this Assignment had not been made; and Assignor hereby ratifies any action which Assignee shall lawfully take to enforce Assignee's rights hereunder. Whether or not Assignee shall have so notified any obligors, Assignor shall at its expense render all reasonable assistance to Assignee in enforcing claims against such obligors.

7. Power of Attorney. Assignor hereby authorizes and empowers Assignee, upon the occurrence and during the continuance of a Default, to make, constitute and appoint any officer or agent of Assignee as Assignor's true and lawful attorney-in-fact, with power (i) to endorse Assignor's name on all applications, documents, papers and instruments necessary or desirable for Assignee in the use or maintenance of the HDTV Patents, (ii) to take any other actions with respect to the HDTV Patents including, without limitation, commencement or continuation of any litigation or administrative proceeding, as Assignee deems in its best interests, (iii) to grant or issue licenses to the HDTV Patents to anyone on terms which Assignee in its reasonable judgment deems commercially reasonable, or (iv) to assign, pledge, convey or otherwise transfer title in or dispose of the

HDTV Patents to anyone on terms which Assignee in its reasonable judgment deems commercially reasonable.

8. Patent Applications; Maintenance and Litigation.

(a) Assignor shall have the duty to preserve and maintain all HDTV Patents as to which a security interest has been granted pursuant to this Assignment. Any expenses incurred in connection with such an application, or in protecting, maintaining or preserving the HDTV Patents, shall be borne by Assignor.

(b) Notwithstanding anything to the contrary in Section 2 hereof, Assignor shall have the right and obligation to commence and diligently prosecute in its own name, as real party in interest, for its own benefit and at its own expense, such suits, proceedings or other actions for infringement, or other damage or reexamination or reissue proceedings as are reasonable to protect any of the HDTV Patents. However, no such suit, proceeding or other action shall be settled or voluntarily dismissed, nor shall any party be released or excused of any claims of, or liability for, infringement without the prior written consent of Assignee, which consent shall not be unreasonably withheld. Assignee shall provide all reasonable and necessary cooperation in connection with any such suit, proceeding or action, including, without limitation, joining as a necessary party.

(c) Assignor hereby agrees to indemnify and hold harmless Assignee for any and all liabilities, obligations, losses, damages, penalties, actions, judgments, suits, costs, expenses or disbursements (including reasonable attorneys' fees) of any kind whatsoever which may be imposed on, incurred by or asserted against Assignee in connection with or in any way rising out of any such suits, proceedings or other actions, or any other suits, proceedings or other actions relating to any or all of the HDTV Patents (including, without limitation, whether brought by Assignor or any other Person, suits, proceedings or other actions in which an allegation of liability, strict or otherwise, is or may be made by any Person who alleges or may allege having suffered damages as a consequence of alleged improper, imprudent, reckless, negligent, willful, faulty, defective or substandard design, testing, specification, manufacturing supervision, manufacturing defect, manufacturing deficiency, publicity or advertisement or improper use, howsoever arising or by whomsoever caused, of any inventions disclosed and claimed in the HDTV Patents or any of them); unless with respect to any of the above, the Assignee is judicially determined to have acted or failed to act with gross negligence or wilful misconduct. The indemnification in

this paragraph shall survive the termination of this Agreement.

9. Amendments, Etc. No amendment or waiver of any provision of this Assignment nor consent to any departure by Assignor heretofore, shall in any event be effective unless the same shall be in writing and signed by the parties hereto, and then such waiver or consent shall be effective only in the specific instance and for the specific purpose for which given, except as provided in Section 5 hereof, in which case the writing need only be signed by Assignee.

10. Addresses for Notices. All notices and other communications to any party provided for hereunder shall be in writing (including telecommunications) and mailed, transmitted or delivered to such party, addressed to it at the address first stated herein for such party, or as to either party at such other address as shall be designated by such party in a written notice delivered to the other party in accordance with the terms of this Section. All such notices and other communications shall be effective as provided in the Note Agreement.

11. Continuing Assignment; Transfers by Assignee.

(a) This Assignment shall create a continuing security interest and collateral assignment of the HDTV Patents and shall (i) remain in full force and effect until payment in full of the Note Obligations and the termination of the Note Agreement, (ii) be binding upon Assignor, its successors and assigns and (iii) inure to the benefit of Assignee, and its successors, transferees and assigns. Upon the payment in full of the Note Obligations (other than indemnities and other contingent liabilities, not then due and payable, that expressly survive the termination of the Note Agreement) and the termination of the Note Agreement, the assignment hereunder shall terminate and all rights to the HDTV Patents shall revert to Assignor, subject to any disposition thereof which may have been made by Assignee pursuant hereto. Upon any such termination, Assignee shall, at Assignor's expense, execute and deliver to Assignor such documents as Assignor shall reasonably request to evidence such termination.

(b) Assignee agrees to give 10 business days notice to Assignor prior to Assignee's taking possession or control of, or Assignee's relevy, attachment or levy on or of, the HDTV Patents or any bond or security which might be required by any court prior to allowing Assignee to exercise any of Assignee's remedies with respect to the HDTV Patents.

12. Cumulative Remedies; Power of Attorney; Effect on Note Agreement. All of Assignee's rights and remedies with respect to the HDTV Patents, whether established hereby, or by any other agreements or by law shall be cumulative and may be

exercised singularly or concurrently. Assignor hereby acknowledges and agrees that this Assignment is not intended to limit or restrict in any way the rights and remedies of Assignee under the Note Agreement, but rather is intended to facilitate the exercise of such rights and remedies. Assignee shall have, upon the occurrence and during the continuation of a Default, in addition to all other rights and remedies given it by this Assignment, those rights and remedies allowed by law and the rights and remedies of a secured party on default under the Uniform Commercial Code as enacted in the State of Illinois at that time.

13. Counterparts. This Assignment may be executed in any number of counterparts, each of which shall be deemed to be an original, but all such separate counterparts shall together constitute but one and the same instrument.

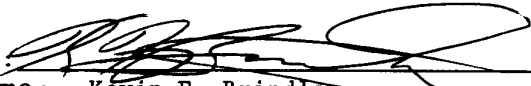

14. Severability. Any provision of this Assignment which is prohibited or unenforceable shall be ineffective to the extent of such prohibition or unenforceability without invalidating the remaining provisions hereof in that jurisdiction or affecting the validity or enforceability of such provision in any other jurisdiction.

15. Governing Law. THIS ASSIGNMENT SHALL BE CONSTRUED IN ACCORDANCE WITH AND GOVERNED BY THE LAWS OF THE STATE OF ILLINOIS.

16. Subordination Agreement. Assignee acknowledges that this Assignment, its rights, title and interest in and to the HDTV Patents, its rights and remedies hereunder and Assignor's duties hereunder are subject to the terms and conditions of the Subordination Agreement.

IN WITNESS WHEREOF, the parties hereto have caused this Assignment to be executed by their respective officers thereunder duly authorized, as of the date first above written.

ZENITH ELECTRONICS CORPORATION, as Assignor

ID	DF Number	Serial No	Patent No	GASP	GAIP	16VSB	Description
1	5872	201137	4907069				Two channel ATV
2	5984	298394	4941049				Reverse scan to minimize ghost visibility
3	6022	298081	4951146				Directionally controlled dispersive filtering
4	6086	453525	5016100				Hybrid with adaptive delta modulation
5	5892	281156	5027163		yes		High level wideband RF mixer
6	5930	239155	5029002		yes		787.5 line progressive display
7	5779CIP5	408150	5040063				Hybrid
8	5779CIP2	370222	5043805	yes			HDIV transmission on "laboo" channel
9	5779CIPFWC	566704	5043812				Hybrid
10	6298	573436	5049992				HDIV receiver operable at different resolutions
11	6314	618188	5060067		yes		Alternately inverted field sync for reducing DC offset in equalizer
12	6228/6331	601169	5086340	yes	yes		Precoder, NISC rejection comb & digital postcoder
13	6364	611236	5087975	yes	yes		Digital VSB & comb filtering (replaced by Keissue)
14	6045	458929	5103312				Time variable dispersive filter
15	6254	551696	5107348				Compression with block filter
16	5779CIP2D	673444	5111287	yes			HDIV transmission on "laboo" channel
17	6393	653560	5113256		yes		Perceptual video model with C's separated in H, V, & D regions
18	6376	636303	5115315				Reversible dispersive filters
19	6342	600458	5121203				GAM implementation of precoder/comb filter
20	6274	600457	5121208				Reverse hybrid
21	6247	539270	5128757				2D compressor with perceptual modelling
22	6328	600469	5122797				Comb plus intersymbol interference filter
23	6192	553822	5136375				Entropy encoding
24	5779CIP4	407526	5136901				Hybrid
25	5779CIP3	408152	5144431				Hybrid
26	6305	709960	5151785				Cochannel reduction with prefilter & inverse postfilter
27	6477	734841	5153723				Audio sampling rate = 3H (48 KHz adopted)
28	6367CIP	678778	5161015				Video peaking based on image classification
29	6328CIP	784334	5162900				Controllable comb & intersymbol interference filter
30		99373	4263616				Signal peaking
31	6323	629523	5173774				Receiver for 525 line NISC & 787.5 line HDIV
32	6382	667153	5181112				Selectively offsetting symbols to generate pilot
33	6382CIP	926008	5241385				GAM implementation of precoder/comb filter
34	6342C	902153	5258938		yes		Select comb/digital postcoder based on interference present
35	6413ACIP	893486	5260793				Hybrid
36	5779CIP6C	908772	5270816				AGC for double conversion tuner
37	6522	815711	5270824		yes		Double balanced RF mixer
38	5892CIP2	746387	5280648		yes		Data segment sync & use for sampling data
39	6402CIP2	894988	5416524	yes	yes		Field sync detection
40	6413CIP2	204972	5598220	yes	yes		FIR filter coefficient updating
41	6520	936144	5392315				Bandwidth LO for double conversion synthesizer
42	6510	815721	5420646				Complementary transmit & receive filters for reducing cochannel
43	6509	865407	5291291		yes

ID	DF Number	Serial No	Patent No	GASP	GARP	16VSB	Description
4416482		887624	5283653		yes	yes	Carrier regeneration in dual NISC/HDTV receiver
456481		907233					Data transmission (eg for interleaving)
46600CIPFWC		67408	5285276				PLL rate
476072FWC		967957	5329319				PLL & SAW resonator on common substrate
486047		887723	5461674				HDTV signal playback control
495892CIP2		746387	5280648				Double balanced mixer
506682		88285	5461619		yes	yes	Multiplexed transmission of compressed video & aux data
516669		14889	5406587		yes	yes	Phase noise tracking loop
536614		931172	5311318				Both sets of double converter digitally controlled by micro
546604		947024	5301019				Data compression with perceptually weighted motion vectors
556592		931177	5438369				Vertically correlating symbols of data segments
566591		931176	5410569				Slicer with soft & hard stages
576571A		18658	5563920				Processing variable length encoded signals
586571		18668	5424733		yes	yes	Switched oscillator for carrier acquisition (also cap coupling to AD)
616753		175333	5410368		yes	yes	Symbol to byte converter
636738		175070	5631645				Lower VSB modes for higher frequency channels
666717		175014	5452009				Five field motion detector for scan line doubler
676726		221133	5475438		yes	yes	Data level selection for multilevel VSB
696767CIP		225201	5508748		yes	yes	Feedback circuit for removing DC from demodulated signal
706789		259284	5475714		yes	yes	MUX decoder with linear (comb) filter
716792		272181	5593889		yes	yes	Last 2 symbols of field copied to next field sync segment
726732A		272357	5629258	yes			Cable maintenance responsive to field sync
736770		301931	5642154		yes	yes	AGC controlled in response to received data
746823		335603	5565932		yes	yes	Convolutional deinterleaver (CIP of 6727)
756811CIP		315153	5572532		yes	yes	Dual mode AGC
766754CIP		320362	5546138				Digital transmission system with field & data segment sync
776413C		324054	5534938	yes		yes	Orienting HDTV antenna
786810		903989	5574509		yes	yes	Phase tracking loop improvements
796689CIPA		366656	5533070		yes	yes	Phase tracking loop improvements
806699CIPB		366844	5533071		yes	yes	Bi-phase stable PLL with pilot augmentation
81671CIP		354408	5627604		yes	yes	NISC selection filter with switched Tomlinson precoder
826858		386589	5602583				AFC filter for FPLL
8367530		345886	5638140				Reducing multiplex filter in ATM/MPEG system
846812		411000	5563884				Integral number of data bytes & RS blocks for all VSB modes
856737CIP		417581	5677911	yes		yes	Field sync with middle 63 PN sequence completely inverted
866874		481664	5619269	yes		yes	Field comb used to determine switching for NISC selection filter
876769		475713	5594496		yes	yes	Optimal offset NISC/ATV & ATV/ATV
886873CIP		479428	5602595	yes			Claim 9 = equalizer implementation (FR filters used for C.C.D)
896875		474049	5574496		yes	yes	FPLL polarity selector operated in response to segment sync
903139DC		493129	4449145		yes	yes	VSB mode selection system
916755C		500272	5621483				NISC selection filter selection in response to energy comparison
926904		501966					
936894		520544			yes	yes	

ID	DF Number	Serial No	Patent No	GASP	GAIP	16VSB	Description
94 6613		516031			Yes		Selective RF circuit for high quality tuner
95 6895		539155	5684822		Yes		Equalizer controlled by DC variation of received signal
96 6919		539149	5572547		Yes		Equalizer controlled by differences in received FSYNC
97 6926		569775					CIP of 6799, plus using DC to control eq. & inversion
98 6894CIP		575008			Yes		Replacement CIP of 6894
99 6732D		586441	5600627	Yes			Trellis modulator design for terrestrial VSB
100 6917		610171					VSB modulation using digital and analog techniques
101 6732C		593733	5636251		Yes		Receiver for trellis coded ATV signal
102 6921		627826			Yes		slice points predicted by lowest path metric
103 6957		645175	5668498		Yes		pilot used to determine PLL polarity and use of input inverter
104 6957		661241					VSB mode detector
105 6961		691656	5675283				Receiver pilot by sub1 DC of demod output with & without pilot
106 6962		691489	5699011				Determining DC offset under zero carrier condition
107 6957CIP		691657	5675294				Frequenclock detector responsive to zero crossings
108 6949		696427					slip phase PLL
109 6893		671464					MPEG transport MUX for independently clocked transport streams
110 6976		697544					Transport Mux with PCR resampler
111 6944		678902	5745004				PLL with relocated 3rd multiplier
112 6971		687866					Data de-rotator and de-interleave
113 6993		725870					SMPE VSB input interface
114 6969		726488					Adjustment of sync levels in multi-mode VSB signal
115 6966		726597					Adjustment of sync levels in an AGC system
116 6966A		726501					Smaller of 1st & 3rd compared samples generates AGC signal
117 6954		729611					1st & 2nd filters for controllably reducing cochannel & noise
118 6934		583733	5692010				Adaptive equalizer with impulse noise protection
119 6994		734224					Stabilizing IF in HDIV modulator
120 6946		751895					Two step field sync identification system
121 6979		713778					Rolling data symbols to maintain proper decoding sequence
122 6998		745549					On-line nonlinear amplitude pre-correction for ATV transmitter
123 2018		815560					Improved oscillator for ATV tuner
124 2017		815561					Hybrid transistor for ATV tuner mixer
125 2016		815559					Pin diode attenuator for ATV AGC circuit
126 6983		791521					Symbol sync recovery
127 6974		735855					HDIV sync separator for multi-standard synchs
128 6975		735615					HDIV compatible vertical sync separator
129 7046		933744					Testing arrangement for MPEG decoders
130 7049		951269					Frame to field converter for MPEG data
131 7038		943916					Double conv. tuner with adjacent channel rejection
132 6904C		971746					VSB mode selection signal
