A new circuit is connected to the pan servo amplifier 38 of a camera remote pan head 44 for the purpose of eliminating the need for manual backpan. The circuit comprises a tachometer 20 mounted on the pan arm of a camera crane or jib arm 28 and connected to switch 32 and potentiometers 34 and 36. The switch and potentiometers select between three options for operation: an off position, a one to one reverse correspondence between the panning movement of the crane arm 28 and the panning movement of the pan head 44, and a variable reverse correspondence between the panning movement of the crane arm 28 and the panning movement of the remote pan head 44. The output is summed to a servo amplifier 38 which drives the remote head pan motor/tachometer 40. A number of means for alternative implementation are also suggested.

What is claimed is:

1. A positioning system for a camera comprising:

a pan and tilt head having a primary pan mechanism and a tilt plate mounted on the primary pan mechanism;

5 a secondary pan mechanism mounted on the tilt plate, the camera being mountable to the secondary pan mechanism, the secondary pan mechanism providing panning of the camera relative to the tilt plate.

2. A system according to Claim 1 further comprising a roll mechanism

10 mounted on the tilt plate, the secondary pan mechanism being mounted to the tilt plate via the roll mechanism.

3. A system according to Claim 1 further comprising a motor for actuating the secondary pan mechanism.

15

4. A system according to Claim 3 further comprising a first sensor for sensing the position of the tilt mechanism.

5. A system according to Claim 1 further comprising a second sensor for

20 sensing the position of the secondary pan mechanism.

6. A system according to Claim 4 or 5 further comprising a controller in communication with the first sensor and the second sensor for controlling operation of

the secondary pan mechanism based in part upon a signal from the first sensor
corresponding to the position of the tilt mechanism.

7. A system according to Claim 1 wherein the pan and tilt head comprises a
5 manually operated cradle tilt head.

8. A system according to Claim 1 wherein the pan and tilt head comprises a
remote head comprising a first motor for driving the primary pan mechanism, a second
motor for driving the tilt mechanism, and a third motor for driving the secondary pan
10 mechanism.

9. A method of modifying a pan and tilt mechanism for positioning a camera
comprising the steps of
installing a secondary pan mechanism on a tilt plate of the pan and tilt
15 mechanism, the secondary pan mechanism being operable separately from the pan and tilt
mechanism; and
mounting the camera on the secondary pan mechanism.

INTELLECTUAL PROPERTY

There exists no list of unpatented or unpatentable methods, devices, technology, trade secrets, proprietary information and know-how.

INTELLECTUAL PROPERTY

1. Agreement dated November 1, 1994, as amended on June 16, 1995, between Lockheed Missiles and Space Company Inc. ("LMSC") and Panavision International, L.P.--concerning LMSC vs. U.S. Patents 4,958,919; 5,020,889 and 5,033,831, and corresponding foreign patents, which relate to liquid lens technology. This License is not transferable without the prior written consent of LMSC.
2. Agreement dated March 7, 1995, between Mantis Wildlife Films PTY Limited; Panavision, a division of Panavision International, L.P. and Jim Frazier -- a joint development and revenue agreement under certain U.S. and foreign patents of which Frazier is the named inventor and property rights therein are owned by Mantis; which subject matter relates to certain "Cine Lens" and "Still Lens" systems. This Agreement is expressly nontransferable without the consent of all three parties.
3. Agreement dated June 1, 1995, between Panavision International, L.P. and Lightstorm Technologies, Inc. -- a joint development and revenue sharing agreement on a patent owned by Lightstorm concerning video viewfinder technology. This Agreement is freely assignable in conjunction with the merger, acquisition, reorganization or transfer of substantially all of the assets of Panavision; otherwise, requires written consent of Lightstorm.
4. Trademark Consent Agreement dated September 1, 1974 between Panavision, Incorporated and GAF Corporation.

Frazier Lens Agreement

Panavision has an agreement with Mantis Wildlife Films to manufacture and rent the Frazier Lens. The agreement calls for a payment of a royalty to Mantis Wildlife Films for the production and rental of the Frazier Lens. Panavision will pay \$5,000 per unit manufactured and will pay 10% of net rental income for the rental of the Frazier Lens.

Lightstorm Agreement

Panavision has an agreement with Lightstorm Technologies to manufacture and rent the Lightstorm VidStick. The agreement calls for a payment of a royalty to Lightstorm Technologies for the rental of the Lightstorm VidStick. Panavision will pay 50% of net rental income for the rental of the Lightstorm VidStick.

Lockheed Agreement

Panavision has an agreement with Lockheed Missiles and Space Company Inc. to manufacture and rent a lens product which would utilize the Lockheed Liquid Lens technology. The agreement, which started in November 1994, has not been utilized by Panavision as of December 1997. It is not certain at this time whether the agreement will be continued. There is no financial commitment by Panavision relative to production of any lenses. If Panavision wishes to continue the agreement and hold the right to utilize the Lockheed liquid lens technology in the future, then a payment of approximately \$20,000 will probably be required. Negotiations are currently underway to secure this right going forward.

Millisecond Agreement

Panavision has an agreement with Millisecond Camera to rent the Millisecond Camera. This agreement calls for a payment of either 35% of the revenue generated by rental of the Millisecond Camera or a flat payment of \$3,000 per month, whichever is greater. This agreement will expire in May 1998, and has a two year option for extension by Panavision.

Listed are all presently known domestic trademark proceedings which have occurred in the past three years and which all, save one in Canada, are presently resolved:

1) Trademark Settlement Agreement dated March, 1977 between Matsushita and Panavision. This Agreement was amended by the attached Agreement, dated July 1, 1980.

Matsushita has filed a number of foreign applications for service marks under the Panasonic name, including coverage for amusement parks and motion picture production facilities. As they have come to our attention, we have protested and filed oppositions where necessary.

2) Agreement settling a dispute between Panavision International and a company called Paravion, regarding the name Paravion for camera mounts. Panavision has now withdrawn the Opposition and Paravion has withdrawn its application.

3) Consent Decree in the lawsuit Panavision International LP v. Panavision Electronics in the Southern District of New York, secured in 1994. Also attached is a draft of a letter reflecting the settlement agreement between the parties following Panavision's filing for a contempt citation.

4) Brief on appeal in the matter between Panavision International and Matsushita, over the registration of the word Panavideo in Canada.

5) Panavision International v. Toeppon is reported at 945 F.Supp. 1296 (DC Cal. 1996) regarding PANAVISION and PANAFLEX marks.
