## PATENT

REEL: 010499 FRAME: 0083

THIS PATENT ASSIGNMENT ("Assignment") is made and entered into as of this 23 day of December, 1999, ("Effective Date") by and between Bob C. Miller, residing at 8601 SE Bristol Way, Jupiter, Florida ("Assignor"), and Jeffrey B. Miller, residing at 2333 W. St. Paul Ave., #206, Chicago, Illinois ("Assignee").

- A. Assignor and Assignee are the co-owners of the entire right, title and interest in, to and under those United States and foreign patents and patent applications identified and set forth on Schedule A (the "Patents").
- B. Assignee wishes to acquire and Assignor wishes to assign all of Assignor's right, title and interest in and to the Patents.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor does hereby sell, assign, transfer and set over to Assignee, the entire right, title and interest in and to the Patents, for the United States and for all foreign countries, including any continuations, divisions, continuations-in-part, reissues, reexaminations, extensions, or foreign equivalents thereof, and including the subject matter of all claims which may be obtained therefrom for its own use and enjoyment, and for the use and enjoyment of its successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment and sale had not been made; together with all income, royalties, damages, or payments due or payable as of the Effective Date or thereafter, including, without limitation, all claims for damages by reason of past, present or future infringement or other unauthorized use of the Patents, with the right to sue for, and collect the same for its own use and enjoyment, and for the use and enjoyment of its successors, assigns, or other legal representatives.

Assignor authorizes and requests the Commissioner of Patents and Trademarks to record Assignee as owner of the Patents, including any continuations, divisions, continuations-in-part, reissues, reexaminations or extensions thereof, and to issue any and all letters patent of the United States thereon to Assignee, as assignee of the entire right, title, interest in, to and under the same, for the sole use and enjoyment of Assignee, its successors, assigns, or other legal representatives.

Assignor hereby represents and warrants that its right, title interest in and to the Patents are free and clear of any liens and encumbrances, that it has full right to assign all of its interests therein, and that it has not executed and will not execute any agreement or other instrument in conflict herewith.

Assignor shall provide Assignee, its successors, assigns or other legal representatives, cooperation and assistance at Assignee's request and expense (including the execution and delivery of any and all affidavits, declarations, oaths, exhibits, assignments, powers of attorney or other documentation as may be reasonably required): (1) in the preparation and prosecution of any applications covering the inventions assigned herein; (2) in the prosecution or defense of any interference, opposition, reexamination, reissue, infringement or other proceedings that may arise in connection with any of the patent rights assigned herein, including, but not limited to, testifying as to any facts relating to the patent rights herein and this Assignment; (3) in obtaining any additional patent protection that Assignee may deem appropriate which may be secured under the laws now or hereafter in effect in the United States or any other country; and (4) in the implementation or perfection of this Assignment.

Assignor shall have no liability for any obligations, claims or causes of action that arise, or may arise, from or in connection with the development, testing, manufacture, distribution or sale of any products covered by or subject to the Patents and Assignee shall hold Assignor harmless from such liability.

Assignee agrees to pay Assignor, not later than March 31 following each year in which Assignee receives income in connection with the Patents, 50% of the net income (gross income less all reasonable expenses) received by Assignee during the preceding calendar year.
