ASSIGNMENT

Docket No. 456800

Serial No. 09/614,362

Filed July 12, 2000

Gregory Brucker and William Penny hereinafter the assignors, for good and valuable consideration, hereby assign to Biosense Webster, Inc., a California corporation, hereinafter the assignee, its successors and assigns, the entire right, title and interest in the invention or improvements of the assignor disclosed in an application for Patent of the United States, identified as Case No. 456800 in the offices of Seyfarth, Shaw, Fairweather & Geraldson, 55 East Monroe, Chicago, Illinois 60603 and entitled ABLATION CATHETER WITH ELECTRODE TEMPERATURE MONITORING in said application and any and all other applications, both United States and foreign, which the assignors may file, either solely or jointly with others, on said invention or improvements, and in any and all Patent of the United States and foreign countries which may be obtained on any of said applications and in any reissue or extension of such patents.

The assignors hereby authorize and request the Commissioner of Patents and Trademarks to issue said Patent to said assignee.

The assignors warrant themselves to be the owner of the entire right, title and interest in said invention or improvements and to have the right to make this assignment, and further warrants that there are no outstanding prior assignments, licenses, or other encumbrances on the interest herein assigned.

For said considerations the assignors hereby agree, upon the request and at the expense of said assignee, its successors and assigns, to execute any and all divisional, continuation and substitute applications for said invention or improvements, and any necessary declaration, oath, or affidavit relating thereto, and any application for the reissue or extension of any Patent that may be granted upon said application, and any and all applications and other documents for Patent in foreign countries on said invention or improvements that said assignee, its successors, or assigns may deem necessary or expedient, and for the said considerations the assignors further agree, upon the request of said assignee, its successors, or assigns, to cooperate to the best of the ability of the assignors with said assignee, its successors, or assigns, in any proceedings or transactions involving such application or patents, including the preparation and execution of preliminary statements, giving and producing evidence, and performing any and all other acts necessary to obtain and enforce said Patent,

both United states and foreign, and vest all rights therein hereby conveyed in the assignee, its successors, and assigns, whereby said patent will be held and enjoyed by the said assignee, its successors and assigns to the full end of the term for which said Patent will be granted, as fully and entirely as the same would have been held and enjoyed by the undersigned if this assignment had not been made.
