hereinafter called the "invention."

Preferred embodiments of the invention are disclosed in U.S. provisional
patent application serial no. 60/183,725 filed February 19, 2000, and in a patent
application being filed at least in the United States Patent and Trademark Office
("USPTO"), identified as Serial No. _____ filed _____, 2001, and
identified in the law firm of Computer Law++, 1211 East Yale Avenue, Salt Lake
City, Utah 84105 as file no. 1760.2.27A (We hereby authorize Computer Law++ to
indicate the application number(s), jurisdiction(s), and filing date(s) when known).
We have reviewed these applications and we are familiar with their contents.

The Assignee, PowerQuest Corporation, a corporation of the State of Utah,
having a principal place of business at 1359 N. Research Way, Building K, Orem,
Utah, 84097, desires more clearly to secure the entire right, title and interest in the
invention. In consideration of \$1.00 and other good and valuable consideration paid
to us by the Assignee, the receipt and sufficiency of which we hereby acknowledge,
and with no reliance on any promise or representation made to us by or on behalf of
the Assignee, WE HEREBY ASSIGN TO THE ASSIGNEE:

The entire right, title and interest in the invention (including subject
matter disclosed but not claimed), all copyright and trade secret rights in
embodiments or designs for the invention or any portion thereof, all rights in
the above-identified United States and international patent applications
including without limitation PCT applications and in all divisions, continua-
tions and continuations-in-part of the applications, or reissues or extensions of
Letters Patent or Patents granted thereon, including all applications specifically
identified by number herein and all applications for which any present
application claims a benefit or is claimed for benefit under 35 U.S.C. § 119 or
§ 120 or § 365, and in all corresponding applications filed in countries foreign

to the United States, and in all patents issuing thereon in the United States and foreign countries; and

The right to file foreign patent applications on the invention in its own name, wherever such right may be legally exercised, including the right to claim the benefits of the International Convention for such applications.

We hereby authorize the Assignee to file patent or copyright applications on the invention in any country in its own name or otherwise as the Assignee sees fit. We hereby authorize and request the United States Commissioner of Patents and Trademarks, and other intellectual property officials in this and foreign countries as are duly authorized by their laws to issue patents or copyright registrations, to issue any and all patents and registrations on the invention to the Assignee as the owner of the entire interest, for the sole use and benefit of the Assignee, its successors, assigns and legal representatives.

We hereby agree, without further consideration and without expense to us, to sign all lawful papers and to perform all other lawful acts which the Assignee may request of us to make this Assignment & Agreement fully effective, including, by way of example but not of limitation, the following:

Prompt execution of all original, divisional, substitute, reissue, and other United States and foreign patent and copyright applications on the invention, and all lawful documents requested by the Assignee to further the prosecution of any of such applications; and

Cooperation to the best of our ability in the execution of all lawful documents, the production of evidence, nullification, reissue, extension, or infringement or interference or other legal proceedings involving the invention; faithful communication to the Assignee of all facts known to us relating to the invention and the history thereof; and generally, taking all reasonable steps which the Assignee shall request to aid in securing, maintaining, and enforcing protection for the invention and to vest title in the Assignee to the invention and all applications, patents, copyrights, and trade secrets based on the invention.

This Assignment & Agreement is effective as of the earliest patent application filing date noted above. It is not intended to supersede, supplant, rescind, or waive any right, title or interest conveyed to Assignee by us, under any prior conveyance, agreement, or operation of law, including without restriction rights created or

conveyed by virtue of our employment by the Assignee. It is not conditioned or based on any future act to be performed by the Assignee.

This Assignment & Agreement may be executed in duplicate counterparts, each of which shall be deemed an original, all of which together are one and the same instrument. We warrant that to the best of our knowledge our contributions to the invention do not and will not infringe anyone's rights. Even if part of this Assignment & Agreement is found unenforceable, the remaining parts are enforceable. This Assignment & Agreement is governed by the laws of the United States and the State of Utah, and any dispute arising from it will be heard in Utah. A failure to exercise rights under this Assignment & Agreement does not mean those rights are waived. This Assignment & Agreement shall be binding upon our heirs and legal representatives.
