**Background.** Inventor has invented a new design for an Attache Case for which he has made application for Letters Patent of the United States, the invention being described in and identified as Docket No. P68210 in the Legal Department of Samsonite Corporation, 11200 East 45th Avenue, Denver, Colorado 80239, and as Application Serial No. 29/137,328 in the United States Patent and Trademark Office.

Inventor now owns the entire right, title, and interest therein.

Assignee is desirous of acquiring the entire right, title, and interest in said design, invention, and improvements thereon, and in said application, and letters patent, copyrights, and similar property rights therefor, when granted in the United States and foreign countries.

**Assignment.** For good and valuable consideration, the receipt and sufficiency of which is acknowledged, inventor has sold, assigned, and set over, and by these presents does sell, assign, and set over, to assignee the entire and exclusive right, title, and interest in the application, the invention and design, any improvements on the invention and/or design heretofore or hereafter made or acquired by inventor, and in any patent, registration, copyrights, and similar industrial property (referred to herein generally as "patent") on the invention, design, and/or the improvements that may be granted in the United States or any foreign countries, including each patent granted on any application which is a substitution, or continuation of the application specifically identified herein, and in each extension of the patent, and in all rights of priority in Taiwan, R.O.C., or under the Paris Convention. Inventor hereby authorizes and requests the Commissioner of Patents and Trademarks to issue said Letters Patent of the United States of America to assignee, consistent with the terms of this agreement.

**Authorization.** Inventor hereby authorizes assignee to file applications for, to obtain, and to maintain, any patent(s) which assignee may elect to seek in any country or jurisdiction of the world.

**Cooperation.** Inventor covenants and agrees with assignee that inventor will not execute any writing or do any act whatsoever conflicting with these presents, and that inventor will, at any time upon request, without further or additional consideration, but at the expense of assignee, execute such additional acts as said assignee may deem necessary or desirable to perfect the assignee's enjoyment of this grant, and render all necessary assistance in making

application for and obtaining original, divisional, renewal, reissued, or extended Letters Patent of the United States, or of any and all foreign countries, on said design and invention, and in enforcing any rights or choses in action accruing as a result of such applications or patents, by giving testimony in any proceedings or transactions involving such applications or patents, and by executing preliminary statements and other affidavits.

**Term.** The patent rights assigned are to be held by assignee to the full end of the term for which the Letters Patent are granted, and for the term or terms of any extension thereof, as fully as the same would have been held by inventor if this assignment had not been made.

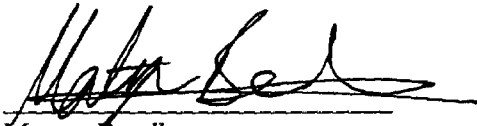

**Successors.** The terms, covenants, and conditions of the assignment shall inure to the benefit of assignee, its successors, assigns and/or other legal representatives, and shall be binding on inventor, his respective heirs, legal representatives, and assigns.
