APPENDIX C

ASSIGNMENT OF PATENTS

For valuable consideration, the receipt and sufficiency of which is hereby acknowledged, PSC INC, a New York corporation ("Assignor"), hereby sells, assigns, transfers, and conveys to SYMBOL TECHNOLOGIES, INC., a Delaware corporation ("Assignee"), whose primary business address is One Symbol Plaza, Holtsville, New York 11742, all of Assignor's right, title, and interest in and to any and all patents, patent applications and inventions (whether or not reduced to practice as of the date of this Agreement) acquired by PSC from GEO LABS, INC., a Pennsylvania corporation, GAP Technologies, Inc., a Delaware Corporation (collectively, "GAP"), including any and all continuations, divisions, continuations-in-part, reissues, re-examinations thereof and any patents, patent applications and inventions subsequently developed by GAP; including without limitation the patents and patent applications (and all rights associated therewith and all drawings, designs, models and other documents evidencing or embodying the inventions which are the subject of such patents) that are set forth in Schedule I hereto.

The rights granted herein shall include the right to file, prosecute and enforce any foreign corresponding patent application in any jurisdiction throughout the world. In addition, Assignee is hereby assigned the full right, title and interest to enforce the rights granted hereunder against any past, present and future infringer (except with respect to PSC with respect to any past infringement) of any of the rights transferred hereunder and to collect all recovery from such enforcement. Assignor shall further provide such other assistance as may be reasonably requested by Assignee for the purpose of enforcing, recording, prosecuting or otherwise effectuating the rights granted hereunder.

Assignor represents and warrants to Assignee that Assignor is the owner of the patents and rights described above; that Assignor has the unrestricted right to make this assignment; that Assignor has not previously assigned or licensed any of the foregoing patents or rights; and that to the best of its knowledge, the patents and rights described above are free of any liens, encumbrances,

security interests, or adverse claims of any nature whatsoever.
