JointASSIGNMENT

WHEREAS, we, Douglas A. Johnson, and Frederick W. Sarles, have invented certain improvements in INDUCTION FOIL CAP SEALER described in an application for United States Letters Patent, the specification of which was filed on May 3, 2001 as Application No. 09/848,561; and

WHEREAS, KAPS-ALL Packaging Systems Inc., (hereinafter "ASSIGNEE"), a corporation organized and existing under the laws of the State of New York, and having a usual place of business at 200 Mill Road, Riverhead, NY 11901-3125, desires to acquire an interest therein in accordance with agreements duly entered into with us;

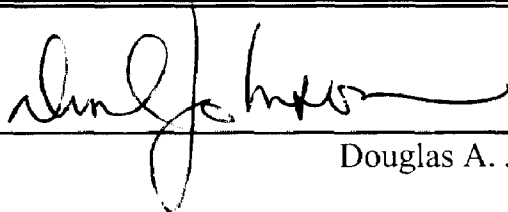

NOW, THEREFORE, to all whom it may concern be it known that for and in consideration of said agreements and in consideration of One Dollar (\$1.00), the receipt of which is hereby acknowledged, we, as effective as early as September 4, 1994, have sold, assigned and transferred and by these presents do hereby sell, assign and transfer unto said ASSIGNEE, its successors, assigns and legal representatives, the entire right, title and interest in and throughout the United States of America, its territories and all foreign countries, in and to said invention as described in said application, including all rights of priority from the filing of said invention, and all rights for past infringement, together with the entire right, title and interest in and to said application and such Letters Patent as may issue thereon; said invention, application and Letters Patent to be held and enjoyed by said ASSIGNEE for its own use and behalf and for its successors, assigns and legal representatives, to the full end of the term for which said Letters Patent may be granted as fully and entirely as the same would have been held by us had this assignment and sale not been made; we hereby convey all rights arising under or pursuant to any and all international agreements, treaties or laws relating to the protection of industrial property by filing any such applications for Letters Patent. We hereby acknowledge that this assignment, being of the entire right, title and interest in and to said invention, carries with it the right in ASSIGNEE to apply for and obtain from competent authorities in all countries of the world any and all Letters Patent by attorneys and agents of ASSIGNEE's selection and the right to procure the grant of all such Letters Patent to ASSIGNEE for its own name as assignee of the entire right, title and interest therein;

AND, we hereby further agree for ourselves and our executors and administrators to execute upon request any other lawful documents and likewise to perform any other lawful acts which may be deemed necessary to secure fully the aforesaid invention to said ASSIGNEE, its successors, assigns and legal representatives, but at its or their expense and charges, including the execution of applications for patents in foreign countries, and the execution of substitution, reissue, divisional or continuation applications and preliminary or other statements and the giving of testimony in any interference or other proceeding in which said invention or any application or patent directed thereto may be involved;

AND, we do hereby authorize and request the Commissioner of Patents of the United States to issue such Letters Patent as shall be granted upon said application or applications based thereon to said ASSIGNEE, its successors, assigns, and legal representatives.

AND, we warrant and represent that as of January 29, 2001, the effective date of the Settlement Agreement between Kaps-All Packaging Systems, Inc. and Wilmington Research and Development Corporation, we have not assigned any rights in and to the invention(s) and/or application to any third party, except for any assignments executed in connection with the Settlement Agreement, and have not taken any action inconsistent with the rights granted by the Settlement Agreement nor this instrument.

IN TESTIMONY WHEREOF, we have hereunto set our hands and affixed our seals the date set forth below.
