**ASSIGNMENT AND AGREEMENT IN  
A UNITED STATES PATENT APPLICATION**

We hereby declare that we are the joint inventors of the invention relating to "STRUCTURED COMPOSITION CONTAINING TERTIARY AMIDE-TERMINATED POLYAMIDE FOR PERSONAL CARE PRODUCTS" as set forth in United States Patent Application No. 09/899,812, which was filed with the United States Patent and Trademark Office and accorded a filing date of July 6, 2001. This application is a continuation-in-part of U.S. Patent Application No. 09/225,889, filed January 4, 1999 (now U.S. Patent No. 6,268,466); where this application fully incorporates by reference the above-listed patent.

For valuable consideration received, we hereby sell, assign and transfer to ARIZONA CHEMICAL COMPANY, a corporation duly organized and existing under the laws of the State of Delaware, and having a place of business at 4600 Touchton Road, Suite 500, Jacksonville, Florida 32246-8225; its successors, and assigns, our entire right, title and interest, for all countries, in and to said invention, and all the rights and privileges under any and all Letters Patents that may be granted on any application that claims priority from the above-identified patent application, including any divisions, continuations, reissues and extensions thereof.

We agree that, when requested, we will, without charge to said corporation but at its expense, sign all papers, take all rightful oaths, make all rightful declarations, and do all acts which may be necessary, desirable, or convenient for securing and maintaining patents or other forms of protection for said invention in any and all countries and for vesting title thereto in said corporation, its successors, assigns, or nominees.

We agree that we will communicate to said corporation or its representatives any facts known to us respecting said invention, and when requested by said corporation, and at its expense, will testify in any legal proceedings, and generally do everything possible to aid said corporation, its successors, assigns, and legal representatives or nominees, to obtain or enforce proper protection for said invention in any and all countries.

We authorize and empower said corporation, its successors, assigns or nominees, to make application for patent or other form of protection for said invention in its or their own name, or in our names, in any and all countries and to invoke and claim for any application for patent or other form of protection for said invention filed by it or them, the benefit of the right of priority provided by the International Convention for the Protection of Industrial Property, as amended, or by any convention which may henceforth be substituted for it, and to invoke and claim such right of priority without further written or oral authorization from ourselves.

We hereby consent that a copy of this Assignment shall be deemed a full legal and formal equivalent of any assignment, consent to file, or like document, which may be required in any country for any purpose and, more particularly, in proof of the right of the said corporation or its successors, assigns, or nominees to apply for patent or other proper protection for said invention and to claim the aforesaid benefits of the right of priority provided by the International Convention for the Protection of Industrial Property, as amended, or by any convention which may henceforth be substituted for it.

We covenant with ARIZONA CHEMICAL COMPANY, its successors, assigns, legal representatives, and nominees, that to the best of our knowledge the right, title, and interest herein conveyed by ourselves is free and clear of any encumbrance, and that we have full right to convey the same as herein expressed.
