Assignment of Patents

WHEREAS, Metera Networks, Inc., a Delaware corporation with a principal business address of 1202 Richardson Drive, Suite 304, Richardson, Texas 75080 (the "Assignor"), owns patents and/or applications for patents, and invention disclosure reports as identified in the attached Exhibit A ("Metera Patents"); and

WHEREAS, Fujitsu Network Communications, Inc., a California corporation with a principal business address of 2801 Telecom Parkway, Richardson, Texas 75082 (the "Assignee"), is desirous of acquiring the entire right, title and interest in and to the Metera Patents in the United States, its territories and possessions ("United States") and all foreign countries, including rights to claim priority, to any provisional applications, and in and to any Letters Patent of the United States or any foreign country which may be granted therefor, including any and all reissues, divisions, continuations, continuations-in-part, renewals, substitutes or extensions thereof (the "Rights");

NOW, THEREFORE, for and in consideration of good and valuable consideration, the receipt of which is hereby acknowledged, Assignor has irrevocably assigned, transferred and conveyed as of the Effective Date, and, to the extent not already done, does hereby irrevocably assign, transfer and convey to Assignee, its successors and assigns, the entire right, title and interest in and to the Metera Patents and Rights. This assignment includes the right in and to all income, royalties, damages and payments now or hereafter due or payable with respect to any Letters Patent which may be granted, and in and to all causes of action (either in law or in equity), and the right to sue, counterclaim, and recover for past, present and future infringement of the rights assigned or to be assigned under this Assignment, as fully and entirely as the same would have been held and enjoyed by Assignor if this assignment had not been made;

AND hereby authorizes and requests the appropriate governmental officials to issue any and all such United States or foreign Letters Patent under the Metera Patents, or resulting from any of the applications thereof, to the Assignee, as the assignee of the entire right, title and interest in and to the same;

AND Assignor hereby represents, warrants and covenants that it has the full right to convey the entire and exclusive interest herein assigned, that it has not executed and will not execute any instrument or assignment in conflict herewith, and that the rights assigned herein are not otherwise encumbered by any grant, lien, security interest, license or other encumbrances;

AND Assignor further covenants and agrees that Assignor will at any time upon request make, execute and deliver without further compensation, any and all other instruments in writing, including further applications, papers, affidavits, power of attorney, assignments, and other documents, and do all lawful acts and things, which, in the opinion of counsel for the Assignee, its successors and assigns, may in any country be required or necessary more effectively to secure to and vest in the Assignee, its successors and assigns the entire right, title and interest in and to the Metera Patents and Rights hereby assigned, transferred and conveyed.

IN WITNESS WHEREOF, Assignor has signed as of the Effective Date, September 28, 2001:

Metera Networks, Inc.
