# ASSIGNMENT OF RIGHTS: PATENT APPLICATION

Ahmad M. Phuly and Gary Gitelman ("Assignors") are owners of the rights to the intellectual property bearing the title of "Method and Apparatus for Indicating a Pattern of Intersection Using a Light Column" as described in the U.S. Patent and Trademark Office Provisional Application number 60/156,497, filed September 28, 1999, the U.S. Patent and Trademark Office Application, registered under the serial number 09/670,684, filed September 27, 2000, and the Patent Cooperation Treaty International Application, serial number PCT/US00/26722, filed September 28, 2000, (the "Patent Applications").

P&G Development Group, Inc., ("Assignee") desires to acquire all rights in and to the Patent Applications and the patent (and any reissues or extensions) that may be granted.

Therefore, for valuable consideration, the receipt of which is acknowledged, Assignor assigns to Assignee 100% of their right, title, and interest in the invention and Patent Application (as well as such rights in any divisions, continuations in whole or part or substitute applications) to Assignee for the entire term of the issued Patent and any reissues or extensions that may be granted and for the entire terms of any and all foreign patents that may issue from foreign applications (as well as divisions, continuations in whole or part or substitute applications) filed claiming the benefit of the Patent Application.

Assignor authorizes the United States Patent and Trademark Office to issue any Patents resulting from the Patent Application to Assignee according to the percentage interest indicated in this assignment. The right, title and interest is to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made.

Assignor further agrees to: (a) cooperate with Assignee in the prosecution of the Application and foreign counterparts; (b) execute, verify, acknowledge and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain the Patent for the invention in any and all countries.
