ASSIGNMENT

Identity Of The Patent Application. I am the inventor (or one joint inventor) of the patents and patent application identified in Exhibit A attached hereto and for which I am assigning herewith.

The Assignee and The Assignment. I assign the patent rights identified herein to Photogen Technologies, Inc. a corporation organized according to the laws of Nevada, having a place of business at 7327 Oak Ridge Highway Knoxville, Tennessee 37931 (hereinafter "the Assignee"). The rights I assign are my entire right, title and interest in the invention or improvements disclosed in the patents and patent application identified in Exhibit A and any and all other applications for United States Letters Patent or foreign letters patent which I may file, either solely or jointly with others, on the invention or improvements, including all continuations, divisionals, and continuations-in-part, and in any and all United States Letters Patent which may be obtained on any of said applications, and in any reissue or extension thereof. I also assign to the Assignee all priority rights under the International Convention for the inventions or improvements. I agree to execute, at the request of the Assignee, all documents in connection with any application for United States letters patent or foreign letters patent therefor.

Payment Received. I am making this assignment in consideration of One Dollar and other good and valuable consideration. I acknowledge the receipt and sufficiency of the consideration.

Further Acts. I agree, upon the request and at the expense of the Assignee, to execute any divisional, continuation or substitute application for the invention or improvements, and any oath, declaration or affidavit relating thereto, and any application for the reissue or extension of any Letters Patent that may be granted upon the application. I agree to perform, upon request, any affirmative acts to obtain said Letters Patent of the United States or foreign letters patent and to vest in the Assignee all rights therein, so that the Letters Patent will be held and enjoyed by the Assignee, to the full end of the term for which said Letters Patent may be granted as fully and entirely as the same would have been held and enjoyed by me if this assignment had not been made.

Interference. In the event that any application or Letters Patent that I now assign becomes involved in interference, I agree to cooperate to the best of my ability in the matters of preparing and executing the preliminary statement and giving and producing evidence in support thereof.
