WHEREAS, The Insitu Group ("ASSIGNEE"), a corporation of the State of Washington having a place of business at 154-D East Bingen Point Way, Bingen, Washington 98605, is desirous of acquiring the entire right, title, and interest in and to the invention and in and to any patents that may be granted therefor in the United States and in any and all foreign countries;

NOW, THEREFORE, in exchange for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, ASSIGNORS hereby sell, assign, and transfer unto ASSIGNEE, its legal representatives, successors, and assigns, the entire right, title, and interest in and to the invention, the patent, including any and all divisions, reissues and continuations, continuations-in-part, re-examinations or extensions thereof, any other inventions described in the patent, and any and all patents of the United States of America and all foreign countries that may be issued for any inventions described in the patent, including the right to file foreign applications directly in the name of ASSIGNEE and to claim priority rights deriving from the United States patent to which foreign applications are entitled by virtue of international convention, treaty or otherwise, the inventions and all patents on the inventions to be held and enjoyed by ASSIGNEE and its successors and assigns for their benefit and of their successors and assigns as fully and entirely as the same would have been held and enjoyed by ASSIGNORS had this assignment, transfer, and sale not been made.

UPON THE ABOVE-STATED CONSIDERATIONS, ASSIGNORS agree to not execute any writing or do any act whatsoever conflicting with this assignment, and at any time upon request, without further or additional consideration but at the expense of ASSIGNEE,

execute all instruments and documents and do such additional acts as ASSIGNEE may deem necessary or desirable to perfect ASSIGNEE's enjoyment of this grant, and render all necessary assistance required for the making and prosecution of applications for United States and foreign patents on any inventions described in the patent, for litigation regarding the patents, or for the purpose of protecting title to any inventions described in the patent or the patents therefor.
