PATENT AND TRADEMARK SECURITY AGREEMENT

This PATENT AND TRADEMARK SECURITY AGREEMENT ("Agreement") is made and entered into as of August 1, 2002, by and among Allied PhotoChemical, Inc., Krohn Industries, Inc., FlexoDeco Inc., SlideKote, Inc., UV Specialties, Inc., DeIceKote, Inc., ("Grantor") and LBCL, LLC, a Michigan limited liability company ("Lender").

BACKGROUND

All capitalized terms used but not defined herein shall have the meanings ascribed to them in the Uniform Commercial Code, as enacted in Michigan (the "Uniform Commercial Code").

NOW, THEREFORE, intending to be legally bound, Grantor and Lender hereby agree as follows:

Section 1. Security Interest in Patents and Trademarks. To secure the complete and timely payment and satisfaction of all Obligations (as hereinafter defined), Grantor hereby grants, assigns and conveys to Lender a security interest in all of the following property, whether now owned or hereafter acquired (the "Collateral"):

(a) all patent applications and patents of Grantor, including but not limited to, all of those which are listed in Exhibits III and IV hereto (collectively, called the "Patents"), including without limitation all rights owned by Grantor corresponding thereto throughout the world and all reissues, divisions, continuances, renewals, extensions and continuations-in-part and all proceeds thereof;

(b) all of Grantor's trademark applications, trademarks (whether common law, registered, unregistered or for which any application to register has been filed), service mark applications, service marks (whether registered, unregistered or for which any application to register has been filed) and trade names, including, but not limited to, all of those which are listed in Exhibits I and II hereto, including without limitation, all renewals thereof and all proceeds thereof (such as, by way of example, license royalties and proceeds of infringement suits), the right to sue for past, present and future infringements, all rights owned by Grantor corresponding thereto throughout the world (all of the foregoing are collectively called the "Marks"), together with the goodwill of the business symbolized by each of the Marks and the registrations (if any) thereof; and

Section 2. Secured Obligations. The security interest created herein is given as security for the prompt payment, and discharge of the indebtedness.

Section 3. Representations and Warranties. In addition to those contained in the Commercial Security Agreement, Grantor represents:

3.01 Patents and Marks Subsisting Enforceable. The Patents and Marks are subsisting and have not been adjudged invalid or unenforceable, in whole or in part; and to the best of Grantor's knowledge, each of the Patents and Marks is valid and enforceable.

3.02 No Infringement Actions. To the best of Grantor's knowledge, there are no actions filed or threatened which legitimately assert that the patents are invalid and to the best of Grantor's information, knowledge and belief the Patents are valid in law, nor, likewise, that the use of any of the Marks does or may violate the rights of any third person.

Section 4.0. Additional Collateral. If before the Obligations shall have been satisfied in full, Grantor shall obtain rights to any patentable inventions, become entitled to the benefit of any additional trademark or service mark registration, or any renewal or affidavit of any Mark, or become entitled to the benefit of any patent application or patent for any reissue, division, continuation, renewal, extension, or continuation-in-part of any Patent or any improvement on any Patent (collectively "Additional Collateral"), such Additional Collateral shall immediately and automatically become part of the Collateral and subject to the security interests and liens granted in favor of Lender hereby, the provisions of section 1 shall automatically apply thereto.

Section 5. Covenants and Agreements of Grantor.

5.01 Maintenance and Inspection of Books and Records. Grantor shall maintain complete and accurate books and records with respect to the Collateral.

5.02 Perfection of Lender's Interests. Grantor agrees to cooperate and join with Lender in taking such steps as are necessary, in Lender's judgment, to perfect or continue the perfected status of the security interests granted hereunder, including, without limitation, the execution and delivery of any financing statements, amendments thereto and continuation statements, the delivery of chattel paper, documents or instruments to Lender, the obtaining of landlords' and mortgagees' waivers required by Lender, the notation of encumbrances in favor of Lender on certificates of title, and the execution and filing of any collateral assignments and any other instruments requested by Lender to perfect its security interest in any and all of Grantor's patents, trademarks, service marks, trade names, and goodwill. As to U. S. Patents and Trademarks, Grantor shall perform such acts at its expense. As to foreign Patents and Trademarks, Grantor shall perform such acts at Lender's expense.

5.03 Cooperation. Grantor agrees to continue to cooperate with Lender by taking all steps that are necessary to perfect Lender's security interests in the Collateral as set forth in Paragraph 5.02 and by notifying Lender of any Patents and Marks that are not described on Exhibits I-IV so that Lender may make any necessary filings to perfect or give notice of its security interests herein.

Section 6. This agreement is subject to the terms of the Commercial Security Agreement executed by Grantor of even date and incorporates by reference thereto the descriptions of the rights and obligations of the parties as described therein.

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed by their duly authorized representatives as follows:
