ASSIGNMENT

This Assignment is made by Stephen R. Kennon ("Assignor").

WHEREAS, Assignor has invented a new and useful invention entitled **Method and System for Solving Finite Element Models Using Multi-Phase Physics**, for which an application for United States Letters Patent was filed on June 29, 2001 bearing Serial No. 09/896,137, which claims priority to U.S. Provisional Application Serial No. 60/215,697 filed on June 29, 2000; and

WHEREAS, Assignor believes himself to be the original inventor of the invention including any and all improvements disclosed in said application ("Invention"); and

WHEREAS, the parties desire to have a recordable instrument assigning the entire right, title and interest in and to said Invention, said application and any patents, invention registrations or other forms of protection ("Patents") that may be granted for said inventions in the United States and throughout the world;

NOW, THEREFORE, in accordance with the obligations to assign the Invention and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor hereby sells, assigns, and transfers to **Object Reservoir, Inc.**, a Delaware Corporation, with a principal place of business at 3536 Bee Caves Road, Suite 300, Austin, Texas 78746 (hereinafter referred to as "Assignee"), the entire right, title, and interest in and to said invention, said application and any Patents that may be granted for said invention in the United States and throughout the world, including the right to file foreign applications directly in the name of the Assignee and to claim for any such foreign applications any priority rights to which such applications are entitled under international conventions, treaties, or otherwise.

Assignor agrees that, upon request and without further compensation, but at no expense to Assignor, he and/or his legal representatives and assigns will do all lawful acts, including the execution of papers and the giving of testimony, that may be necessary or desirable for obtaining, sustaining, reissuing, or enforcing the Patents in the United States and throughout the world for said Invention, and for perfecting, recording, or maintaining the title of Assignee, its successors and assigns, to said Invention, said application, and any Patents granted for said Invention in the United States and throughout the world.
