PATENT ASSIGNMENT

This Patent Assignment (this "Assignment") is made as of September 15, 2003 by and between The Top-Flite Golf Company (f/k/a Spalding Sports Worldwide, Inc.), a Delaware corporation ("Assignor"), and Callaway Golf Company, a Delaware corporation ("Assignee").

RECITALS

A. Assignor and Assignee have entered into the Asset Purchase Agreement dated as of June 30, 2003, as amended (the "Purchase Agreement").

B. Pursuant to Section 1.1 of the Purchase Agreement, Assignor desires to assign to Assignee, and Assignee desires to acquire all of Assignor's right, title, and interest in and to all of the issued patents and pending patent applications listed on Exhibit A hereto (collectively, the "Assigned Patents").

AGREEMENT

NOW, THEREFORE, in consideration of the foregoing premises, the covenants and agreements contained in the Purchase Agreement and in this Assignment, and for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, and to implement the assignment of Intellectual Property required by the Purchase Agreement, Assignor hereby agrees as follows:

1. Capitalized terms used but not defined in this Assignment shall have the meanings ascribed to such terms in the Purchase Agreement.

2. Assignor does hereby sell, transfer, convey, assign, grant, set over and deliver to Assignee, and Assignee hereby accepts, all of Assignor's right, title, and interest in and to the Assigned Patents, free and clear of all liens, mortgages, options, charges, title defects, security interests and similar encumbrances, the same to be held by Assignee for Assignee's own use and enjoyment, and for the use and enjoyment of Assignee's successors, assigns, designees, nominees and other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment and sale had not been made, together with all causes of action (in law or equity), claims, demands and any other rights for, or arising from any past, present or future infringement, of the Assigned Patents, along with the right to sue for and collect any damages for the use and benefit of Assignee and Assignee's successors, assigns, designees, nominees and other legal representatives.

3. Assignor represents, warrants, and covenants that the execution and delivery of this Assignment does not breach any agreement to which Assignor is a party, and Assignor has not entered into, and will not enter into, any oral or written agreement in conflict with this Assignment.

4. As may be requested by Assignee or its designees or other legal representatives from time to time after the date hereof, Assignor agrees to assist Assignee, or Assignee's successors, assigns, designees, nominees or other legal representatives, in a commercially

reasonable manner, without further consideration, to (i) evidence, record, and perfect the assignment of the Assigned Patents and (ii) secure Assignee's rights in the Assigned Patents, including, but not limited to, the execution, delivery and filing of all applications, specifications, oaths, assignments, powers-of-attorney, and similar instruments that Assignee deems reasonably necessary to assign and convey to Assignee, or Assignee's successors, assignees, designees, nominees or other legal representatives, all right, title and interest in and to the Assigned Patents.

5. Assignor hereby authorizes and requests the United States Patent and Trademark Office and any corresponding foreign office whose duty it is to issue, certify, or assign registrations or applications for patents to issue, certify or assign as appropriate, the same to Assignee and Assignee's successors, assigns, designees, nominees and other legal representatives in accordance with the terms of this Assignment.
