ASSIGNMENT OF INVENTIONS

WHEREAS, the Regents of the University of California, and hereinafter referred to as "THE REGENTS", a corporation organized and existing under the laws of the State of California, and having its statewide administrative offices located at 1111 Franklin Street, Oakland, California 94607-5200, is the owner, by virtue of assignments recorded in the United States Patent and Trademark Office of the United States patents and patent applications identified in the attached Exhibit A, hereby made a part thereof.

AND WHEREAS, the INTEL CORPORATION, hereinafter referred to as "INTEL", having its principal office in Santa Clara, California 95052, desires, pursuant to the Intellectual Property Agreement relating to LLNL CRADA Case No. TC-1363-96, to acquire from THE REGENTS the entire right, title, and interest in, to, and under the patent identified in Exhibit A including any and all reissue, divisional, continuation and reexamination applications thereof and any patents that may issue thereon, and the inventions described and/or claimed in such patents and patent applications, together with any and all foreign counterpart applications and/or foreign patents corresponding to such patents and patent applications (hereinafter collectively referred to as "INVENTIONS").

NOW, THEREFORE, for valuable consideration received by THE REGENTS, receipt and sufficiency of which is hereby acknowledged, THE REGENTS has sold, assigned and transferred and hereby does sell, assign and transfer to INTEL, for the United States of America and for all foreign countries, the entire right, title, and interest in and to the INVENTIONS including the right to apply for and receive patents, and to claim International Convention priority in all foreign countries. THE REGENTS further agrees without further consideration to execute assignments, deeds, or other instruments required by foreign countries to perfect, vest and confirm the assignments to INTEL of THE REGENTS entire right, title, and interest in and to any and all foreign patent applications corresponding to the United States patents and patent applications identified in Exhibits A. Also, THE REGENTS authorizes and requests the Commissioner for Patents and Trademarks of the United States of America and the corresponding official in any foreign country to issue any Letters Patent which may be granted on the INVENTIONS in the United States or foreign country, respectively, to INTEL for its sole use and benefit and for its successors and assigns to the full end of the term for which the Letters Patent may be granted, as fully and entirely as the same would have been held by THE REGENTS had this assignment not been made. THE REGENTS hereby also assigns to INTEL the entire right, title and interest to any and all claims for profit and damages by reason of past infringement of any of its rights with respect to such inventions along with the right to sue and collect such profit and damages for its own use and benefit and for the benefit of its successors, assigns or legal representatives.

IN WITNESS WHEREOF, THE REGENTS intending to be legally bound has affixed its signature.

The Regents of the University of California
