Assignment of Patent Rights

Whereas, Roy H. Taylor ("Assignor") is owner of the invention known as the Swingless Golf Club as described within the following three U.S. Patent Applications signed by Assignor:

Description	Applications #	Date	Patent Serial #	Filing Date
Ballistic Impeller Golf Club	500,413	07/10/95	5,522,594	06/04/96
Ballistic Impeller Golf Club	746,672	11/14/96	5,924,932	07/20/99

Whereas, Swingless Golf Corporation ("Assignee") desires to acquire all rights in and to the Patent Applications and the patents (and any reissues or extensions) that may be granted.

Now, therefore, for valuable consideration including stock, the receipt of which is acknowledged, and payment to Assignor of future royalties in the form of 3% of gross profit per Swingless Golf Club sold by Assignee, Assignor assigns to Assignee 100% of his right, title, and interest in the invention and Patent Applications (as well as such rights in any divisions, continuations in whole or part or substitute Applications) filed claiming the benefit of the Patent Applications, to Assignee for the entire term of the issued Patents and any reissues or extensions that may be granted, for Assignee's use in manufacturing and selling Swingless Golf clubs in the fifty (50) United States and the remainder of Continental North America including the Caribbean Islands (the CNA Region).

Assignor authorizes the United States Patent and Trademark Office to issue any Patents resulting from the Patent Applications to Assignee according to the percentage interest indicated in this assignment. The right, title and interest are to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made. Assignee's obligation to pay royalties to Assignor, and to pay all future patent maintenance fees and make available all cost of goods data to Assignor on demand, shall also extend to Assignee's successors and assigns.

Assignor further agrees to: (a) cooperate with Assignee in the prosecution of the Applications; (b) execute, verify, acknowledge and deliver all such further papers, including patent Applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain the Patents for the invention.
