## Assignment of Invention Before Patent (herein "Assignment")

### Section 1 Background

We, Víctor Omark Méndez Ferreira and Ken Morse of Colorado (herein "Inventors"), while working within and for CU's Powerhouse, have invented or discovered a new and useful process, machine, manufacture, or composition of matter, or an improvement thereof, for which a nonprovisional patent application is being filed concurrently with the U.S. Patent Office entitled: **Segmented Plate for Assembly within a Confined Area having Limited Access** [targeted for filing ~ 15 August 2003]. The University of Colorado, through its System Technology Transfer Office (herein "CU TTO"), a Colorado non-profit organization with a principal place of business at University of Colorado at Boulder, 4001 Discovery Drive, Suite 390, UCB 588, Boulder, Colorado 80309 desires to acquire the Inventors' entire right, title, and interest in the invention/discovery, and the Inventors are willing and able to sell—all of which is consistent with the University of Colorado Policy on Patents and Inventions and any other arrangements under which the Inventors perform(ed) work.

### Section 2 Assignment of all interest to CU TTO

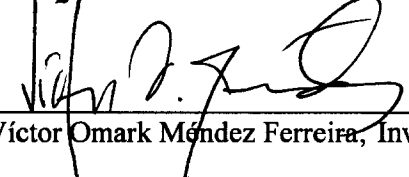

In consideration of *one dollar* and other good and valuable consideration, of which receipt is acknowledged by each of the Inventors, the Inventors hereby sell and assign to CU TTO their entire right, title, and interest:

- (1) in said invention or discovery, and
- (2) in all United States and foreign applications filed therefor including but not limited to provisional, divisional, continuation, continuation-in-part, reissue, or reexamination applications, and
- (3) in any Letters Patent which issue in the United States or elsewhere including but not limited to: utility, utility model, or design patents; patents of implementation, improvement, or addition; inventor's certificates; and extensions of any of these, so that said right, title, and interest is held and enjoyed by CU TTO, its successors and assigns, as fully and entirely as it would have been held and enjoyed by Inventors had this Assignment and sale not been made.

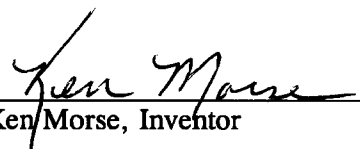

The Inventors hereby agree to fully execute all documents or papers necessary for obtaining Letters Patent in the United States and elsewhere, and continue to furnish all data, information, and documentation which may be required for the preparation, filing, and prosecution of applications for said Letters Patent.

Since this Assignment is intended for recording with the Patent Office, the Commissioner for Patents is hereby directed to issue any patent which may hereafter be granted, to the University of Colorado, through its System Technology Transfer Office, in accordance with this duly executed Assignment.

Acknowledging and fully intending to be legally bound, the Inventors sign below to duly execute this Assignment making it effective on or as of 01-June-2000.
