ASSIGNMENT OF PATENTS

WHEREAS, Cytotherapeutics, Inc. (hereafter "Assignor"), a Delaware corporation having a principal place of business at 525 Del Rey Avenue, Suite C, Sunnyvale, California 94086, is the sole and exclusive owner of all right, title and interest in and to the Patents and Patent Applications set forth on Schedule A, attached hereto; and

WHEREAS, Neurotech S.A. (hereafter "Assignee"), a corporation having a principal place of business at Bâtiment Genepole Industries, 4 rue Pierre-Fontaine, 91000 Evry, FRANCE, is desirous of acquiring the entire right, title and interest in and to said Patents and Patent Applications.

NOW, THEREFORE, TO ALL WHOM IT MAY CONCERN, BE IT KNOWN, that for good and valuable consideration, the receipt of which is hereby acknowledged, Assignor has sold, assigned, transferred and conveyed and by these presents does hereby sell, assign, transfer and conveyed, unto said Assignee, its successors and assigns, the entire right, title and interest in and to the Patents and Patent Applications as set forth and described in Schedule A, attached hereto, including pending and abandoned applications and all divisions, continuations, continuations-in-part and renewals thereof, and all Patents which may be granted thereon and all reissues, re-examinations and extensions thereof; and all applications for industrial property protection, including, without limitation, all applications for patents, utility models, and designs which may hereafter be filed for an invention described in any of the foregoing applications, including pending and abandoned applications, in any country or countries of the world, together with the right to file such applications and the right to claim for the same the priority rights derived from said applications under the Patent Laws of the United States, the International Convention for the Protection of Industrial Property, or any other international agreement or the domestic laws of the country in which any such application is filed, as may be applicable; and all forms of industrial property protection, including, without limitation, patents, utility models, inventors' certificates and designs which may be granted for said invention in any country or countries of the world and all extensions, renewals and reissues thereof; together with all claims for damages by reason of past infringement, with the right to sue for, and collect the same for the use of Assignee, its successors and assigns.

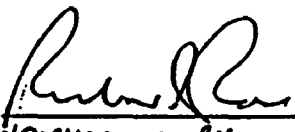

Assignor hereby authorizes and requests the Commissioner of Patents and Trademarks of the United States, and any official of any country or countries foreign to the United States, whose duty it is to issue patents or other evidence or forms of industrial property protection on applications as aforesaid, to issue the same to the Assignee, its successors, legal representatives and assigns, in accordance with the terms of this instrument.

Assignor hereby covenants and agrees that it has full right to convey the entire interest herein assigned, and that it has not executed, and will not execute, any agreement in conflict herewith.

This assignment is effective as of this 29th day of December, 1999.

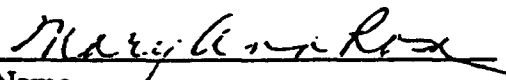

IN WITNESS WHEREOF, Assignor has caused these presents to be signed by a duly authorized officer.
