Assignment and License**Execution Copy**

S. C. Johnson & Son, Inc. ("Johnson") having offices at 1525 Howe Street, Racine, WI 53403, is the owner by assignment from the inventors of the entire right, title and interest in and to the United States patents listed, below, together with all patents and patent applications, substantially identical to or claiming priority therefrom, world-wide, and all letters patent or comparable rights issuing therefrom (collectively, the "Patents"). Without limitation, "Patents" shall include utility patents as well as design patents and design registrations.

For good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Johnson hereby sells, assigns, and transfers to Whitmire Micro-Gen Research Laboratories, Inc. ("Whitmire"), having offices at 3568 Tree Court Ind. Blvd., St. Louis, MO., the full and entire right, title and interest in and to the Patents.

Whitmire hereby grants Johnson an exclusive license, together with the right to sublicense its affiliates, world-wide, paid-up, royalty-free, and irrevocable (the "License"), to make, have made, import, use, sell, and offer for sale all inventions covered by the claims of any of the Patents. Except with respect to the right to sublicense its affiliates, the License shall not be sublicensed and shall not be transferable. The License shall be without limitation, extending to all fields of use and channels of trade except the manufacture, import, use, distribution, or sale for or to Industrial Channels of Trade. "Industrial Channels of Trade" shall mean trade channels through which commercial formulated and sized specialty chemical products normally travel and in which such products and related services are offered for sale to commercial, industrial, and institutional end users only but specifically excluding all channels through which consumers purchase consumer products now or in the future. Thus, by way of example and without limitation, the License is exclusive for products and sales directed to the consumer market, including products and sales in food, drug, mass merchandising, do-it-yourself stores, and comparable channels of trade that make products available for direct purchase by consumers, whether or not commercial, industrial, and institutional end users also purchase products from the same channels of trade provided however, that the sale of products to food, drug, mass merchandising, do-it-yourself stores and comparable channels of trade for their own internal consumption and not for resale, shall constitute purchases by commercial end users in the Industrial Channels of Trade. Whitmire shall have no obligation to maintain any of the Patents.
