 REEL: 014739 FRAME: 0929

INTELLECTUAL PROPERTY ASSIGNMENT

WHEREAS, I, Igor Palley, an individual ("Assignor"), am the sole inventor of the inventions described in the U.S. Provisional Patent Application No. 60/427028 entitled "Method of Making Complex Twisted Blades with Hollow Airfoil Cross Section and the Turbines Based on Such" (the "'028 Application"). I, Igor Palley, am also the sole inventor of the inventions described in the U.S. Nonprovisional Utility Patent Application, of the same title, ("Utility Application") that claims priority from the '028 Application.

WHEREAS, GCK, Inc., a corporation ("Assignee"), desires to obtain the entire right, title, and interest in and to the '028 Application and the Utility Application (collectively, "Applications") and all inventions that are now and will be in the future described in patent applications that claim priority from the Applications (collectively, "Inventions").

THEREFORE, in consideration of the sum of ten dollars (\$10.00) and other valuable consideration, the receipt of which is hereby acknowledged, I the Assignor assign to Assignee, its successors, legal representatives, and assigns, effective November 17, 2003, the entire right, title, and interest in and to the Inventions, the Applications, and any issued patent claiming priority from the Applications; and all applications for intellectual property protection, including, without limitation, all applications for patents, utility models, and designs which may hereafter be filed for the Inventions in any country or countries foreign to the United States, together with the right to file such applications and the right to claim for the same the priority rights derived from the Applications under the Patent Laws of the United States, the International Convention for the Protection of Industrial Property, or any other international agreement or the domestic laws of the country in which any such application is filed, as may be applicable; and any causes of action related to the Applications and Inventions that may have accrued in Assignor's favor.

I the Assignor warrant that I have full right to convey the interests assigned, and that I have not executed, and will not execute, any agreement in conflict with this agreement; and I hereby further warrant that I will communicate to the Assignee, its successors, legal representatives, and assigns, any facts known to me respecting the Applications and Inventions, and testify in any legal proceeding, sign all lawful papers, execute all divisions, continuing, and reissue applications, make all rightful oaths, and generally do everything possible to aid the Assignee, its successors, legal representatives, and assigns, to obtain and enforce proper patent protection for the Inventions in all countries.

I the Assignor authorize and request the Commissioner for Patents of the United States, and any official of any country or countries foreign to the United States, whose duty it is to issue patents or other evidence or forms of intellectual property protection on applications for such protection, to issue the same to the Assignee, its successors, legal representatives, and assigns, in accordance with the terms of this agreement.

Signed November 17, 2003.

Igor Palley
