## ASSIGNMENT OF PATENTS

ASSIGNMENT OF PATENTS (the "Assignment"), effective as of August 25, 2000, made by Prestolite Digital LLC, a Delaware limited liability company (the "Assignor"), to Krone Digital Communications Inc., a Delaware corporation (the "Assignee").

A. Prestolite Wire Corporation, a Delaware corporation that controls the Assignor ("Prestolite"), and GenTek Inc., a Delaware corporation that wholly-owns and controls the Assignee ("GenTek"), entered into an Asset Purchase Agreement (the "Agreement"), dated as of July 5, 2000, under which Prestolite agreed to sell to GenTek, or to a Subsidiary of GenTek, and GenTek agreed to purchase from Prestolite, or from a Subsidiary of Prestolite, substantially all of the assets of Prestolite's Telecom Business, which assets include the Assigned Patents.

B. Capitalized terms used in this Assignment without definition shall have the meanings given to them in the Agreement.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor agrees as follows:

1. Assignment. Assignor does hereby transfer, convey, assign and deliver to Assignee all right, title and interest of Assignor in and to, including without limitation the right to make, to use and to vend, all patents (including design patents, industrial designs and utility models) and patent applications, together with any patent disclosures and inventions (whether or not reduced to practice) and any reissues, divisions, continuations, continuations-in-part, and extensions or improvements thereof and foreign counterparts thereof, set forth on Schedule I attached hereto and incorporated by reference herein (collectively, the "Assigned Patents"), free and clear of any mortgage, pledge, hypothecation, assignment, security deposit arrangement, encumbrance, lien (statutory or other), charge or other security interest or any preference, priority or other security agreement or preferential arrangement of any kind or nature whatsoever; all rights to apply for registration in foreign countries with full benefit of such priority as may now or hereafter be granted to it by law, treaty or other international convention; and all rights, interests, claims and demands recoverable in law or equity, that Assignor has or may have in profits and damages for past, present and future infringements of the Assigned Patents, including, without limitation, the right to compromise, sue for and collect such profits and damages; all of the foregoing to be held and enjoyed by Assignee, its successors and assigns or their legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment had not been made.

2. Further Actions. Assignor hereby agrees that Assignor shall execute and deliver such assignments, endorsements and other instruments and evidences of transfer and give such further assurances and perform such further acts as the Assignee

may reasonably request and as may be reasonably necessary in order to render effective the consummation of the transactions contemplated hereby.

3. Miscellaneous. This Assignment shall be governed by, and construed in accordance with, the laws of the United States, in respect to patent issues and in all other respects including as to validity (except for patent issues), interpretation and effect by the laws of the State of New York, without giving effect to the conflict of laws rules thereof.
