PATENT ASSIGNMENT

THIS ASSIGNMENT (this "*Assignment*") is effective as of November 2, 2004 ("*Effective Date*") between **Interservices, Inc.** ("*Assignor*"), and **Northern Cable & Automation, LLC**, a Michigan limited liability company ("*Assignee*").

WHEREAS, Assignor wishes to assign to Assignee, and Assignee wishes to obtain from Assignor, the United States patents set forth on the attached Schedule A, together with all associated patent rights to the inventions disclosed therein (collectively, the "*Patents*"),

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor hereby assigns to Assignee its entire right, title and interest in and to the Patents, for the United States and for all foreign countries, including, without limitation, any continuations, divisions, continuations-in-part, reissues, reexaminations, extensions or foreign equivalents thereof, and including the subject matter of all claims that may be obtained therefrom, and all other corresponding rights that are or may be secured under the laws of the United States or any foreign country, now or hereafter in effect, for Assignee's own use and enjoyment, and for the use and enjoyment of Assignee's successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment had not been made, together with all income, royalties, damages or payments due or payable as of the Effective Date or thereafter, including, without limitation, all claims for damages by reason of past, present or future infringement or other unauthorized use of the Patents, with the right to sue for, and collect the same for its own use and enjoyment, and for the use and enjoyment of its successors, assigns, or other legal representatives

Assignor hereby authorizes and requests the U S. Director of Patents and Trademark Office, and the corresponding entities or agencies in any applicable foreign countries, to record Assignee as owner of the Patents.

Assignor shall, at Assignee's expense, take all further actions, and provide to Assignee, Assignee's successors, assigns or other legal representatives, all such cooperation and assistance (including, without limitation, the execution and delivery of any and all affidavits, declarations, oaths, exhibits, assignments, powers of attorney or other documentation), requested by Assignee to more fully and effectively carry out the purposes of this Assignment, including, without limitation, with respect to the following: (1) the preparation and prosecution of any applications relating to any of the rights assigned herein; (2) the prosecution or defense of any interference, opposition, reexamination, reissue, infringement or other proceedings that may arise in connection with any of the rights assigned herein, including, without limitation, testifying as to any facts relating to the Patents and this Assignment; (3) obtaining any additional patent protection relating to any of the rights assigned herein that Assignee may deem appropriate that may be secured under the laws now or hereafter in effect in the United States or any foreign country; and (4) the implementation or perfection of this Assignment in all applicable jurisdictions throughout the world.
