INTELLIGENT POWER MANAGEMENT CONTROL SYSTEM AND METHOD

Said invention is described or intended to be described and set forth in the patent application presently identified as Docket No. 134358XZ, which was filed on August 1, 2003, as United States Application Number 10/633,063.

We previously signed an assignment of our rights in and to the present invention that listed both General Electric Company and GE Medical Systems Global Technology Company, LLC. After this assignment was submitted to the United States Patent and Trademark Office for recording, we realized that the assignment of rights may invite confusion as to the proper assignee. We intended to assign our invention to **GE Medical Systems Global Technology Company, LLC, a Delaware limited liability company with offices at 3000 North Grandview Boulevard, Waukesha, WI 53188 ("Assignee")**.

General Electric Company, by the signature below, acknowledges that it has no objection to, and hereby approves, a *nunc pro tunc* transfer in which our original rights are transferred to GE Medical Systems Global Technology Company, LLC.

We warrant and represent that we conceived said invention ourselves, that no one other than us is a joint inventor of said invention, and that neither we nor any of us have assigned or agreed to assign any rights in said invention or said application to anyone other than said assignee or a predecessor in interest to said assignee.

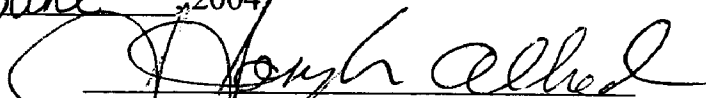

NOW, THEREFORE, in accordance with obligations entered into pursuant to an Employee Innovation and Proprietary Information Agreement or other agreement and for other good and valuable consideration of which we acknowledge receipt, we hereby assign to said Assignee, its successors and assigns, *nunc pro tunc*, the entire worldwide right, title, and interest in and to said invention, said application, and any Letters Patent which may be granted for said invention, said application, and any and all divisions, continuations, continuations-in-part, reissues, reexamination certificates, substitutes, and extensions of said application (each of which is included herein as a part of "said application"), including but not limited to all our United States and other national rights to said invention and said application and all our rights under the Paris Convention for the Protection of Industrial Property and all other applicable treaties or laws in respect to said invention and said application.

We hereby authorize and request the United States Commissioner of Patents and Trademarks to issue any Letters Patent which may be granted for said invention or upon said application unto said assignee, its successors and assigns, in accordance with this assignment.

We hereby authorize said assignee to apply for patents on said invention in foreign countries, claiming the filing date of said application under the provisions of the Paris Convention for the Protection of Industrial Property and all other applicable treaties and laws, and we further agree to execute any and all documents that may be required or desired by said assignee in order that said assignee may apply for Letters Patent on said invention in foreign countries in our or its name.

We hereby agree to promptly communicate to said assignee or its representatives any facts known to us respecting said invention or said application; to testify in any legal proceeding relating thereto; to sign all lawful papers, including but not limited to all divisional, continuing, continuing-in-part, reissue, substitute, and extension applications, all rightful oaths or declarations, and documents confirming or substituting for this assignment.
