ASSIGNMENT OF PATENT RIGHTS

I, Edward E. Miller, pursuant to 35 USC 261, being first duly sworn, depose and state:

THAT I am the inventor of the invention and/or inventions disclosed and claimed in the application for UNITED STATES LETTERS PATENT entitled "**WATER CONTROL IN A SUBSURFACE FORMATION**" filed 2/27/2004 Serial Number 10/789,207;

THAT I, for good and valuable consideration, the receipt of which is hereby acknowledged, promise to bargain and sell, assign, transfer, grant and convey and, by this instrument, do bargain and sell, assign, transfer, grant and convey to Fritz Industries, Inc. a Corporation of the State of Texas, its successors and assigns, all of whom are hereinafter jointly and severally referred to as the assignee, my entire right, title and interest, for the United States of America and its territorial possessions and for any and all foreign countries, in and to the application identified above, and to the invention and/or inventions disclosed and claimed therein;

THAT this assignment extends to any and all continuations, divisions and/or continuations-in-part of the said application and to any and all letters patent or reissues thereof which may mature from the said application.

I, without additional consideration, agree to apply for letters patent for the above assigned invention whenever the assignee shall so request regardless of my status at the time of such request as an independent contractor or as an employee, former employee, agent or consultant of the assignee. I agree to assist in the preparation and prosecution of applications for any such letters patent, sign any and all appropriate papers, to subscribe to all lawful oaths and to perform all lawful acts required of me by the assignee to enable the filing and prosecution of applications for any such letters patent in whatever country or countries of the world as may be desired by the assignee. I am informed and understand that I shall not be required by the assignee to bear any expense whatsoever which is normally and usually associated with the filing and prosecution of any application for letters patent which may be prepared and filed pursuant to this assignment.

I still further agree, upon the request and at the expense of the assignee, regardless of my status at the time of such request as an independent contractor or as an employee, former employee, agent or consultant of the assignee, to assist the assignee in all proper ways, such as by testifying under oath, in any administrative or judicial proceeding involving the title, infringement, priority, validity or scope of any invention assigned by me pursuant to this assignment.

I request, in accordance with 35 USC 152, that any letters patent maturing from any application filed pursuant to this assignment be granted to the assignee, and that the assignee have and enjoy for its own use and behoof, to the full end of the term for which said letters patent may be granted, all of the same rights, powers, privileges and immunities associated with such grant as fully and completely as would have been held and enjoyed by me as if this assignment, transfer, grant and conveyance had not been made.
