ASSIGNMENT

Serial No.: 10/982,507
Filed: 11/05/2004
Title: Improved Refuse Body With Ejection Wall
Date of Execution: October 27, 2004, November 4, 2004
Name of Inventors: Robert D. Jones, Virgil Collins, Marlin L. Johnson, Randy J. Heller, Jeffrey E. Errthum, Jared L. Rowland, and Kenneth D. Goedken

For \$1.00 and other valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the undersigned hereby assigns to Kann Manufacturing Corporation of Guttenberg, Iowa, its successors and assigns, the entire right, title and interest in the invention of the undersigned disclosed in an application for United States patent as described above, and in any other applications, whether filed in the United States or another country, which the undersigned may file, either alone or with others, on the invention, and in any and all patents or inventor's certificates issued by the United States or another government which may be issued on any application regarding such invention, and in any re-issues or extensions of such patents or inventor's certificates.

We further authorize and request the Commissioner of Patents of the United States to issue such patent or patents to the assignee, Kann Manufacturing Corporation.

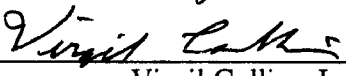

We hereby agree, upon the request of the assignee, or its successors and assigns, to execute any regular, divisional, continuation, continuation-in-part, or substitute applications for the invention, and any necessary oath or affidavit relating to such applications, and any application for the re-issue or extension of any patent or inventor's certificate that may be granted upon the application, and to cooperate with the assignee to the best of our ability in the prosecution of the application for patent set forth above, including all actions which may arise from such prosecution.

We understand that the execution of this Assignment will serve to transfer all of our rights under any patents or inventor's certificates which may issue as a result of the above described application, for the entire term of such patents.
