## INTELLECTUAL PROPERTY SECURITY AGREEMENT

This INTELLECTUAL PROPERTY SECURITY AGREEMENT (as amended, amended and restated, supplemented or otherwise modified from time to time, the "**IP Security Agreement**") dated October 5, 2005, is made by Capital Safety Inc., a Delaware corporation, D B Industries, Inc., a Minnesota corporation, and SINCO, Inc., a Delaware corporation (collectively, the "**Grantors**"), in favor of Barclays Bank PLC, as Security Trustee (the "**Security Trustee**") for the Secured Parties (as defined in the Facilities Agreements referred to below). Capitalized terms used herein but not defined herein shall be used herein as defined in the Senior Facilities Agreement or the Security Agreement, as applicable.

WHEREAS, Glowtrail Limited (to be renamed Capital Safety Group Limited) (the "**Parent**"), a company organized under the laws of England and Wales, and certain of its Subsidiaries have entered into a Senior Facilities Agreement dated October 3, 2005 (said Agreement, as it may hereafter be amended, amended and restated, supplemented or otherwise modified from time to time, being the "**Senior Facilities Agreement**") with the Security Trustee, as arranger, agent, issuing bank and security trustee on behalf of the Secured Parties (as defined therein).

WHEREAS, the Parent and certain of its Subsidiaries have entered into a Mezzanine Facility Agreement dated October 3, 2005 (said Agreement, as it may hereafter be amended, amended and restated, supplemented or otherwise modified from time to time, being the "**Mezzanine Facility Agreement**", and together with the Senior Facilities Agreement, the "**Facilities Agreements**") with the Security Trustee as arranger, agent and security trustee on behalf of the Secured Parties (as defined therein).

WHEREAS, the Parent and certain of its Subsidiaries have entered into an Intercreditor Agreement dated October 3, 2005 (said Agreement as it may hereafter be amended, amended and restated, supplemented or otherwise modified from time to time, being the "**Intercreditor Agreement**") with the Security Trustee as senior facility agent, mezzanine facility agent and security trustee, the institutions named therein as lenders and others.

WHEREAS, as a condition precedent to the making of Utilisations and the issuance of Letters of Credit by the Finance Parties under the Facilities Agreements, each Grantor has executed and delivered that certain Security Agreement dated October 5, 2005 made by the Grantors to the Security Trustee (as amended, amended and restated, supplemented or otherwise modified from time to time, the "**Security Agreement**").

WHEREAS, under the terms of the Security Agreement, Grantors have granted a security interest in, among other property, certain intellectual property of the Grantors to the Security Trustee for the ratable benefit of the Secured Parties, and have agreed as a condition thereof to execute this IP Security Agreement covering such intellectual property for recording with the U.S. Patent and Trademark Office, the United States Copyright Office and other governmental authorities.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, each Grantor agrees as follows:

**PATENT**  
**REEL: 016621 FRAME: 0449**

SECTION 1. Grant of Security. Each Grantor hereby grants to the Security Trustee for the ratable benefit of the Secured Parties a security interest in and to all of such Grantor's right, title and interest in and to the following (the "***Collateral***"):

(i) the material United States, international, and foreign patents, patent applications and statutory invention registrations, including without limitation, the patents and patent applications set forth in Schedule A hereto (as such Schedule A may be supplemented from time to time by supplements to the Security Agreement and this IP Security Agreement, each such supplement being in substantially the form of Exhibit C to the Security Agreement (an "***IP Security Agreement Supplement***"), executed and delivered by such Grantor to the Security Trustee from time to time), together with all reissues, divisions, continuations, continuations-in-part, extensions and reexaminations thereof, all inventions therein, all rights therein provided by international treaties or conventions and all improvements thereto, and all other rights or any kind whatsoever of such Grantor accruing thereunder or pertaining thereto (the "***Patents***");

(ii) the material trademarks (including, without limitation, service marks), certification marks, collective marks, trade dress, logos, domain names, product configurations, trade names, business names, corporate names and other source identifiers, whether or not registered, whether currently in use or not, including, without limitation, all common law rights and registrations and applications for registration thereof, including, without limitation, the trademark registrations and trademark applications set forth in Schedule B hereto (as such Schedule B may be supplemented from time to time by IP Security Agreement Supplements executed and delivered by such Grantor to the Security Trustee from time to time), and all other marks registered in the U.S. Patent and Trademark Office or in any office or agency of any State or Territory of the United States or any foreign country (provided that no security interest shall be granted in intent to use trademark applications to the extent that, and solely during the period in which, the grant of a security interest therein would impair the validity or enforceability of such intent to use trademark applications under applicable federal law), and all rights therein provided by international treaties or conventions, all renewals of any of the foregoing, together in each case with the goodwill of the business connected therewith and symbolized thereby, and all rights corresponding thereto throughout the world and all other rights of any kind whatsoever of such Grantor accruing thereunder or pertaining thereto (the "***Trademarks***");

(iii) the material copyrights, copyright applications, copyright registrations and like protections in each work of authorship, whether statutory or common law, whether published or unpublished, any renewals or extensions thereof, all copyrights of works based on, incorporated in, derived from, or relating to works covered by such copyrights, including, without limitation, the copyright registrations and copyright applications set forth in Schedule C hereto (as such Schedule C may be supplemented from time to time by IP Security Agreement Supplements executed and delivered by such Grantor to the Security Trustee from time to time), together with all rights corresponding thereto throughout the world and all other rights of any kind

whatsoever of such Grantor accruing thereunder or pertaining thereto the "*Copyrights*";

(iv) any and all claims for damages for past, present and future infringement, misappropriation or breach with respect to the Patents, Trademarks and Copyrights, with the right, but not the obligation, to sue for and collect, or otherwise recover, such damages; and

(v) any and all proceeds of the foregoing.

SECTION 2. Security for Obligations. The pledge and assignment of, and the grant of a security interest in, the Collateral by each Grantor under this IP Security Agreement secures the payment of all Liabilities at any time due, owing or incurred by the undersigned to any Secured Party under the Finance Documents (including, for the avoidance of doubt and without limitation, any obligation relating to any increase in the amount of the facilities provided under any Finance Document).

SECTION 3. Recordation. Each Grantor authorizes and requests that the Register of Copyrights, the Commissioner of Patents and Trademarks and any other applicable government officer record this IP Security Agreement.

SECTION 4. Execution in Counterparts. This Agreement may be executed in any number of counterparts, each of which when so executed shall be deemed to be an original and all of which taken together shall constitute one and the same agreement.

SECTION 5. Grants, Rights and Remedies. This IP Security Agreement has been entered into in conjunction with the provisions of the Security Agreement. Each Grantor does hereby acknowledge and confirm that the grant of the security interest hereunder to, and the rights and remedies of, the Security Trustee with respect to the Collateral are more fully set forth in the Security Agreement, the terms and provisions of which are incorporated herein by reference as if fully set forth herein.

SECTION 6. Governing Law. This IP Security Agreement shall be governed by, and construed in accordance with, the laws of the State of New York.

[THE REMAINDER OF THIS PAGE IS INTENTIONALLY LEFT BLANK.]

IN WITNESS WHEREOF, each Grantor has caused this Agreement to be duly executed and delivered by its officer thereunto duly authorized as of the date first above written.
