## **PATENT AND PATENT APPLICATION ASSIGNMENT**

This Patent and Patent Application Assignment (this "Assignment") is effective upon January 19, 2005 (the "Effective Date") and is by and between **Nashua Corporation**, an American corporation incorporated in the Commonwealth of Massachusetts (the "Assignor") and **Fusion Optix Inc.**, an American corporation incorporated in the State of Delaware (the "Assignee").

WHEREAS, Assignor owns the entire right, title, and interest in and to certain inventions, discoveries, know how, techniques, methodologies, and data ("Technology") set forth in certain United States, foreign, and international patents more particularly identified on **Schedule A** attached hereto ("Issued Patents"), and the Technology set forth in certain foreign and international patent applications also more particularly identified on **Schedule A** attached hereto ("Patent Applications"); and

WHEREAS, it is the intention of the parties that Assignor assign to Assignee the Assignor's entire right, title and interest in and to the Issued Patents and the Patent Applications.

NOW, THEREFORE, for good and valuable consideration furnished by Assignee to Assignor, the receipt and sufficiency of which is hereby acknowledged, the Assignor and Assignee intend to be legally bound as follows.

### **1. Issued Patents**

Assignor does hereby assign, sell, transfer, and deliver to Assignee, as of the Effective Date and free and clear of all liens, and Assignee hereby receives and accepts from Assignor, the entire right, title, and interest of Assignor in and throughout the United States of America, its territories, and all foreign countries and any political subdivision of a foreign country, in and to the Issued Patents and the Technology set forth and claimed therein and all reissues, reexaminations, substitutions, and extensions thereof, all such right, title, and interest to be held and enjoyed by the Assignee to the full end of the term for which the Issued Patents have been or will be granted, renewed, substituted, reexamined, extended, or reissued, as fully and entirely as the same would have been held and enjoyed by the Assignor if this Assignment had not been made, and Assignor hereby assigns the right to sue and recover for, and the right to profits or damages due or accrued, arising out of or in connection with any and all past, present, or future claims and causes of action for infringement of such Issued Patent(s) or Technology, including all rights to injunctive relief in respect to such infringement.

### **2. Patent Applications**

Assignor does hereby assign, sell, transfer, and deliver to Assignee, as of the Effective Date and free and clear of all liens, and Assignee hereby receives and accepts from Assignor, the entire right, title, and interest of Assignor in and throughout the United States of America, its territories, and all foreign countries and any political subdivision of a foreign country, in and to the Technology as set forth and claimed in the Patent Applications, and any and all other applications which may claim priority under United States law or international convention, including, but not limited to, non-provisionals, continuations, divisions, reissues, reexaminations, substitutions, or extensions thereof, and in and to any and all patents of the United States and foreign countries and any political

subdivision of a foreign country which may be issued for said Technology. Assignor hereby assigns the right to sue and recover for, and the right to profits or damages due or accrued, arising out of or in connection with any and all past, present, or future claims and causes of action for infringement of such Technology or Patent Applications, including all rights to injunctive relief in respect to such infringement. Assignor further authorizes Assignee to file patent applications in any or all countries on any or all of said Technology in the Assignor's name or in the name of the Assignee or otherwise as Assignee may deem advisable, under the international convention or otherwise.

### 3. Registration and Issuance of Patents

Assignor hereby authorizes and requests the Director of the United States Patent and Trademark Office and the empowered officials of all other governments and foreign countries and any political subdivision of a foreign country to record Assignee as the owner of the Issued Patents and the Patent Applications and to issue to Assignee, in lieu of Assignor, in accordance with this instrument, all future letters patent, notices, and any other communications and documents bearing on the Issued Patents, Patent Applications, or on patents based on the Patent Applications.

### 4. Further Assurances

From time to time after the Effective Date of this Assignment, upon reasonable request of Assignee and at Assignee's expense, Assignor shall execute, acknowledge, and deliver such further conveyance instruments and take such other actions as may be reasonably necessary to evidence or effect the transfer of ownership of the Technology, Issued Patents, and Patent Applications from Assignor to Assignee. Assignee shall reimburse Assignor for any and all costs reasonably incurred by Assignor in its performance under this paragraph.
