PATENT
REEL: 016889 FRAME: 0661

CONFIRMATORY ASSIGNMENT

Whereas I, Michael Tal, whose residence address is 123 Peckhill Road, Woodbridge, CT 06525, have made certain inventions or discoveries (or both) set forth in the following patent applications:

U.S. Patent Application Serial Number 10/329,173, filed December 24, 2002 and entitled "Vascular Access Device";

U.S. Patent Application Serial Number 60/343,814, filed December 26, 2001 and entitled "Vascular Access Device"; and

International Patent Application Serial Number PCT/US02/041371, filed December 24, 2002 and entitled "Vascular Access Device"; and

Whereas, by an assignment document ("the Prior Assignment") executed on November 26, 2003, and recorded on Reel 014890, Frame 0247, I intended to assign my entire right, title, and interest in and to said inventions and discoveries to Yale University, whose address is 2 Whitney Avenue, New Haven, CT 06511, and which, together with its successors and assigns, is hereinafter called "Assignee"; and

Whereas a typographical error resulted in Assignee's being identified in the Prior Assignment as "Yale University Corporation of the State of Connecticut"; and

Whereas I wish to confirm that Assignee was the entity to which my entire right, title, and interest in and to said inventions, discoveries, and patent applications were to be assigned by the Prior Assignment, and I wish to assign, transfer, and convey any right, title, and interest that I may retain in and to said inventions, discoveries, and patent applications to Assignee; and

Whereas Assignee wishes to clarify the chain of title of said inventions, discoveries, and patent applications;

Now, therefore, for valuable consideration furnished by Assignee to me, the receipt and sufficiency of which I hereby acknowledge, I hereby, without reservation:

1. Affirm that Assignee was the entity to which I intended to assign my entire right, title, and interest in and to said inventions, discoveries, and patent applications by the Prior Assignment;
2. Assign, transfer, and convey to Assignee the entire right, title, and interest, if any, that I retain in and to said inventions, discoveries, and patent applications, any and all other applications for Letters Patent on said inventions and discoveries in whatsoever countries, including all divisional, renewal, substitute, continuation, continuation-in-part, national stage, regional stage, and Convention applications based in whole or in part upon said inventions or discoveries, or upon said applications, and any and all Letters Patent, reissues, reexaminations, and extensions of Letters Patent granted for said inventions and discoveries or upon said applications, and every priority right that is or may be predicated upon or arise from said inventions, said discoveries, said applications, and said Letters Patent;
3. To the extent I am now able, authorize Assignee to file patent applications in any or all countries on any or all of said inventions and discoveries in my name or in

the name of Assignee or otherwise as Assignee may deem advisable, under the International Convention or otherwise;

4. To the extent I am now able, authorize and request the Director of the United States Patent and Trademark Office and the empowered officials of all other governments to issue or transfer all said Letters Patent to Assignee, as assignee of the entire right, title, and interest therein or otherwise as Assignee may direct;

5. Warrant that, other than in the Prior Assignment, I have not knowingly conveyed to others any right in said inventions, discoveries, applications, or patents or any license to use the same or to make, use, or sell anything embodying or utilizing any of said inventions or discoveries;

6. Bind my heirs, legal representatives and assigns, as well as myself, to do, upon Assignee's request and at Assignee's expense, but without additional consideration to me or them, all acts reasonably serving to assure that the said inventions and discoveries, the said patent applications, and the said Letters Patent shall be held and enjoyed by Assignee as fully and entirely as the same could have been held and enjoyed by me, my heirs, legal representatives, and assigns if this assignment and the Prior Assignment had not been made; and particularly to execute and deliver to Assignee all lawful application documents including petitions, specifications, and oaths, and all assignments, disclaimers, and lawful affidavits in form and substance as may be requested by Assignee; to communicate to Assignee all facts known to me relating to said inventions and discoveries or the history thereof; and to furnish Assignee with any and all documents, photographs, models, samples, and other physical exhibits in my control or in the control of my heirs, legal representatives or assigns which may be useful for establishing the facts of my conceptions, disclosures, and reduction to practice of said inventions and discoveries.

In testimony of which I have executed this Confirmatory Assignment as an instrument under seal on the date indicated next to my name.
