Assignment

As a below named inventor, I hereby declare that:

My residence, post office address and citizenship are as stated below next to my name.

Whereas, I have made an invention in (a/an) CORDLESS HAND SCANNER, and the following patent application filings are based thereon:

A U.S. Design Application for Patent, Docket No. SC.2004.14;

filed herewith on or after the date next to my signature below;

filed on March 5, 2005, and subsequently assigned Application Serial No. 29/224,697.

Now, therefore, for good and valuable consideration, receipt of which is acknowledged, I have agreed to assign and transfer and do hereby assign and transfer unto Socket Communications, a corporation of Delaware, having its principal office at 37400 Central Court, Newark, California, 95460, its successors and assigns, the entire right, title and interest in and to the said invention and application(s), and in and to any subsequent applications that claim priority to or continue from said application(s), and in and to any and all Letters Patent and reissues and extensions thereof, of the United States of America, countries foreign thereto, and multi-government organizations (including the right to apply for Letters Patent in foreign countries and before multi-government entities in its own name and to claim any priority rights for such foreign and multi-government applications to which such applications are entitled under international conventions, treaties, or otherwise), which have been or may be granted on any of the foregoing to be held and enjoyed as fully and exclusively as they would have been by me had this assignment and transfer not been made;

I do further agree for myself and for my heirs, executors and administrators, to execute and deliver without further consideration any further applications, assignments and documents, that may be deemed reasonable and necessary to obtain Letters Patent in any or all countries;

And I do hereby authorize and request the Commissioner of Patents to issue any and all Letters Patent which may be granted upon any of the said applications, to the said Socket Communications, as the assignee of the entire interest therein.
