ASSIGNMENT OF PATENTS

THIS ASSIGNMENT OF PATENTS is made as of January 9, 2006 by TSI Telsys, Inc., a Maryland corporation ("Assignor"), to ProSync Technology Group, LLC, a Maryland limited liability company ("Assignee").

Recitals

A. Assignor and Assignee have entered into an Asset Purchase Agreement dated January 9, 2006 (the "Purchase Agreement"), pursuant to which Assignor is selling and Assignee is purchasing the Acquired Assets (as defined in the Purchase Agreement), including, but not limited to, any and all patents of Assignor.

B. Pursuant to the Purchase Agreement, Assignor has agreed to execute such instruments as Assignee may reasonably request in order more effectively to assign, transfer, grant, convey, assure and confirm to Assignee and its successors and assigns, or to aid and assist in the collection of or reducing to possession by the Assignee of, all of the Acquired Assets.

C. In furtherance of the foregoing, Assignor desires to assign, transfer, grant, convey, assure and confirm to Assignee, and Assignee desires to accept the transfer and assignment of, all of Assignor's worldwide right, title and interest in, to and under Assignor's registered and unregistered domestic and foreign patents and patent applications, including, but not limited to, the patents and patent applications listed on Schedule 1 attached hereto and incorporated herein by reference (all of the foregoing being referred to herein as the "Patents").

NOW, THEREFORE, Assignor, for and in exchange for the payment of the Purchase Price (as defined in the Purchase Agreement), the receipt of which is hereby acknowledged, does hereby assign, transfer, grant, convey, assure and confirm to Assignee, and Assignee hereby accepts the transfer and assignment of, all of Assignor's worldwide right, title and interest in, to and under the Patents, together with the goodwill of the business associated therewith and which is symbolized thereby, all rights to sue for infringement of any Patent, whether arising prior to, on, or after the date of this Assignment of Patents, and any and all renewals and extensions thereof that may hereafter be secured under the laws now or hereafter in effect in the United States of America, Canada and in any other jurisdiction, the same to be held and enjoyed by Assignee, its successors and assigns from and after the date hereof as fully and entirely as the same would have been held and enjoyed by Assignor had this Assignment of Patents not been made.

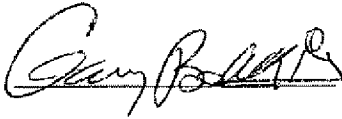

Except to the extent that federal law preempts state law with respect to the matters covered hereby, this Assignment of Patents shall be governed by and construed in accordance with the internal laws of the State of Maryland, without giving effect to the principles of conflicts of laws thereof.

Capitalized terms used in this Assignment of Patents (including, without limitation, the Recitals set forth above) but not defined herein have the respective meanings specified in the Purchase Agreement.
