ASSIGNMENT OF PATENTS

WHEREAS, EDMOND B. CICOTTE, an individual having an address of 11086 Hedgway Drive, Utica, Michigan 48317 ("Assignor") is the named inventor and sole owner of U.S. Patent No. 5,351,573 issued October 4, 1994; U.S. Patent No. 5,771,752 issued June 30, 1998; U.S. Patent No. 5,823,064 issued October 20, 1998; and corresponding and counterpart patents and patent applications in various countries of the world (collectively, the "Patents"); and

WHEREAS, KSR INDUSTRIAL CORP., a corporation organized and existing under the laws of the State of Michigan having offices at 20300 Civic Center Drive, Southfield, Michigan 48076 ("Assignee") is desirous of acquiring all of Assignor's right, title and interest in and to the Patents and any inventions disclosed therein (the "Inventions");

NOW THEREFORE, for good and valuable consideration, the receipt of which is hereby acknowledged, and intending to be legally bound hereby, Assignor hereby sells, assigns, conveys, and transfers to Assignee all of his right, title and interest in and to the Patents and the Inventions in all countries of the world, including without limitation the patents and patent applications listed in Schedule A and all Inventions disclosed therein; all reissues, reexaminations, divisions, continuations, continuations-in-part and extensions of the Patents; all rights of priority resulting from the Patents; all rights of priority resulting from the applications for the Patents; all rights of action arising from the Patents; all claims by reason of infringement of the Patents; and the right to sue and collect damages for such infringement, to be held and enjoyed by Assignee for its own use and benefit and for its successors and assigns as the same would have been held by Assignor had this assignment not been made.

Assignor represents and warrants that he has full power and authority to transfer to Assignee full ownership and title to the Patents free and clear of any adverse claim by any person including any current or former attorney or law firm that has represented Assignor. Assignor further represents and warrants to Assignee that the Patents are not subject to any security interest, lien, mortgage, or other encumbrance of any nature whatsoever.

Assignor covenants that he will, if and when requested, without charge to Assignee, but at Assignee's expense, sign all papers, take all rightful oaths, make all rightful declarations, and do all acts that may be necessary, desirable, or convenient for securing and maintaining the Patents or other forms of protection for Inventions disclosed therein in any and all countries and for vesting title thereto in Assignee, its successors, assigns, or nominees.

Assignor covenants that he will communicate to Assignee or its representatives any facts known to him respecting said Inventions and when requested by Assignee and, at Assignee's expense, will testify in any legal proceedings, and generally do everything reasonably possible to aid Assignee, its successors, assigns and legal representatives or nominees, to obtain or enforce proper protection for inventions disclosed in the Patents in any and all countries.

Assignor hereby authorizes and empowers Assignee, its successors, assigns or nominees, to make application for patent or other form of protection for said Inventions in its or their own name; or in his name, in any and all countries and to invoke and claim for any application for patent or other form of protection for said Inventions filed by it or them, the benefit of the right

of priority provided by the International Convention for the Protection of Industrial Property, as amended, or by any convention which may henceforth be substituted for it, and to invoke and claim such rights of priority without further written or oral authorization from Assignor.

Assignor hereby consents that a copy of this Assignment shall be deemed a full legal and formal equivalent of any assignment, consent to file or like document which may be required in any country for any purpose and more particularly in proof of the right of the said corporation or its successors, assigns or nominees to apply for patent or other International Convention for the Protection of Industrial Property, as amended, or by any convention which may henceforth be substituted for it.

Assignor covenants that he will never contest the validity of the Patents assigned hereunder or any re-issued, re-examined, or other patent claiming priority, in whole or in part, to any application that matured into any of the Patents.

Assignor's covenants herein will be binding on Assignor's heirs, administrators, executors, successors, and assigns.

Assignee covenants that it will not assert the assigned Patents against products made by Cicotte, his licensee or assignee that incorporate the subject matter claimed in any one or more of U.S. Patent Nos. 6,279,425; 6,423,939; 6,431,022; or 6,701,799 (collectively, the "Later Cicotte Patents"). For avoidance of doubt, the preceding covenant does not apply to (a) any patent other than the Patents being assigned to Assignee hereunder, or (b) any subject matter that is not claimed in the Later Cicotte Patents.
