ASSIGNMENT OF PATENT

Assignment made this 12th day of April, 2006, by Rodney J. Hayes of Cody, Wyoming, Grantor, to Irene A. Linseth of 2914 Manitoba Lane, Bismark, Burleigh County, North Dakota, Assignee.

Grantor has been the assignee of a previous Assignment of Patent involving a device described in the records of the United States Patent and Trademark Office as "Bolus with Animal ID and Temperature Transponder" (Bolus EID Device), which is now protected by United States Patent No. 6,012,415. The corresponding application is United States Patent Application No. 08/843,451. The Assignment of Patent to Grantor was from MagTrac Bolus, L.L.C., over the signature of Norman J. Hayes as Manager. Thereafter Norman J. Hayes, as Manager of MagTrac Bolus, L.L.C., executed a Revocation of Assignment of Patent, revoking the previous assignment from MagTrac Bolus, L.L.C., to Rodney J. Hayes.

For good and valuable consideration, the receipt of which is hereby acknowledged, Rodney J. Hayes, as Grantor, does hereby transfer and assign to Irene A. Linseth, as Assignee, together with her successors, transferees, and assigns, all of Grantor's present and future right, title, and interest in and to the Bolus EID Device described in United States Patent No. 6,012,415, in and to the letters patent for United States Patent No. 6,012,415, any and all patents on said Bolus EID Device in foreign countries or that may be granted on said device in any foreign country, all associated foreign patent applications, any and all rights and claims associated with said patent, all proceeds of the patent, all powers and privileges relating to said patent, and in any and all reissue or extensions of the patent.

The patent rights assigned are to be held by Assignee to the full end of the term for which the letters patent are granted, and for the term or terms of any extension of the same, as fully as the same would have been held by the inventor of no assignment from the inventor had been made.

Grantor Rodney J. Hayes warrants that he has not, in either his individual or in a representative capacity, granted any license, nor has he otherwise allowed an encumbrance to be placed, on the patent for the Bolus EID Device, United States Patent No. 6,012,415, or on any of the foreign patent rights assigned under this assignment. Grantor Rodney J. Hayes further warrants that he has not executed, and will not hereafter execute, in either his individual or in any representative capacity, any agreement in conflict with this Assignment.

Assignment of United States Patent No. 6,9012,415
Rodney J. Hayes to Irene A. Linseth
