ASSIGNMENT

TITLE: "Personal Speakerphone"

SERIAL NUMBER: Unassigned

DATE FILED:

INVENTORS: Casey Peterson
Christopher Bourne

DOCKET NUMBER: 12077.032

WHEREAS, the Inventors are the inventors of an invention or discovery referred to as the "Invention" which is described and claimed in the attached United States patent application ("Patent Application") and having the Title listed above;

WHEREAS, ClearOne Communications, Inc. ("Assignee") is desirous of acquiring all of the rights, title and interest in the Invention and the Patent Application:

NOW, THEREFORE, in return for good and valuable consideration, receipt of which is hereby acknowledged, the Inventors by these presents, do hereby sell, assign, and transfer unto Assignee all rights, title and interest in and to the following: (1) said Invention as described in the Patent Application, (2) the Patent Application, (3) any U.S. or foreign patent applications which claim priority to the Patent Application whether or not presently existing, (4) any U.S. or foreign patent applications which claim subject matter that is disclosed in the Patent Application, and (5) any letters patent issuing from any of said patent applications, and (6) all intellectual property (including patent rights, trade secrets and copyrights) in, to, or underlying said Invention. Said assignment is without any geographic limitation and shall include the United States of America and all foreign countries. All rights, title and interest in said Invention, said patent applications, any Letters Patent issuing from said patent applications, and said intellectual property are to be held and enjoyed by Assignee for its own use and behalf, and for that of its legal representatives and assigns, as fully and entirely as the same would have been held by the Inventors had this assignment not been made. Assignee shall be free to assign, license or otherwise exploit said Invention, said patent applications, any Letters Patent issuing from said patent applications, and said intellectual property.

AND the Inventors do further agree to sign all papers, make all rightful oaths and do all requisite acts for the filing of any disclaimer or for the filing and assignment of any other patent application (including utility, divisional, continuing, continuation-in-part, reissue and foreign applications) based on the present patent application or said Invention. Any such other patent application is deemed to be part of the above assignment.

AND the Inventors do further represent and warrant that they have not executed or granted any assignment, license, covenant not to sue, or dedication to the public domain of any of said patent applications, the Invention, or said intellectual property, and that they have otherwise not granted any other rights which would be inconsistent with Assignee acquiring all right, title and interest in and to said patent applications, the Invention, and said intellectual property.

AND the Inventors do further agree to communicate to Assignee, its successors, assigns or other legal representatives, such facts relating to said Invention as may be known to them, and to testify as to such facts in any prosecution, interference, enforcement proceeding or litigation related to the Invention.
