PATENT ASSIGNMENT

This PATENT ASSIGNMENT is dated as of February 17, 2006 (this "Assignment") between Agilix Corporation, a Delaware corporation ("Assignor"), and PerkinElmer LAS, Inc., a Delaware corporation ("Assignee").

RECITALS

WHEREAS, pursuant to that certain Asset Purchase Agreement between Assignor and Assignee dated as of February 17, 2006 (the "APA"), Assignor has agreed to assign to the Assignee all of the Assignor's right, title, and interest in and to the Intellectual Property included in the Assets, each as defined in the APA, including, without limitation, the patents and patent applications listed on Schedule A hereto and any other subsequent applications claiming priority to such applications, and all divisions, continuations, continuations-in-part, substitute applications, reissues, re-examinations, and extensions thereof, and the inventions embodied therein (collectively, the "Patents").

NOW, THEREFORE, in consideration of the APA and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree as follows:

1. Assignment. Assignor hereby assigns, conveys, and transfers to Assignee all rights, titles, and interests in and to the Patents, including any renewals and extensions of the Patents that are or may be secured under the laws of the United States and all foreign countries, now or hereafter in effect, for Assignee's own use and enjoyment, and for the use and enjoyment of Assignee's successors, assigns, or other legal representatives, together with all income, royalties, or payments due or payable as of the effective date of this assignment or thereafter, including, without limitation, all claims for damages by reason of past, present, or future infringement or other unauthorized use of the Patents with the right to sue for and collect the same for Assignee's own use and enjoyment, and for the use and enjoyment of its successors, assigns, or other legal representatives.
2. Authorization. Assignor authorizes and requests the Commissioner of Patents and Trademarks, or any other official whose duty is to record ownership of patents in the United States and in all foreign countries, to record the Assignee as the owner of the Patents.
3. Further Assurances. At Assignee's request, Assignor will assign and deliver to Assignee all files, documents, and correspondence pertaining to the Patents, including all correspondence to and from the U.S. Patent and Trademark Office, and any and all legal counsel advising on or assisting with the prosecution or Maintenance of the Patents. In addition, at Assignee's expense and reasonable request, Assignor will provide further cooperation reasonably necessary (such as executing and delivering additional assignments, affidavits, and other documents and providing information and materials) to obtain, perfect, and defend the Patents in this or any foreign country.
4. Covenant Not to Sue. Assignor hereby releases, discharges, and covenants not to assert any claim, cause of action, or right of action against Assignee and/or Assignee's parents, subsidiaries, customers, distributors, affiliates, joint venturers, agents, employees, directors,

successors, and assigns, in which Assignor asserts that it is the owner of the Patents, or has the right to receive royalties or enjoy any other rights and/or benefits Assignor would have if Assignor was an owner of the Patents.

5. Miscellaneous. This Assignment will be binding upon and inure to the benefit of the parties hereto and their respective successors and permitted assigns, each of which such successors and permitted assigns will be deemed to be a party hereto for all purposes hereof. This Assignment and any of the terms contained herein may be amended or modified by the Assignor and Assignee only in writing. This Assignment is executed by, and shall be binding upon, the Assignor and the Assignee and their respective successors and assigns, for the uses and purposes set forth and referred to above, effective immediately upon its delivery to the Assignee. In the event that any provision of this Assignment is construed to conflict with a provision in the Agreement, the provision in the Agreement shall be deemed to be controlling. This Assignment shall be governed by and construed in accordance with the laws of The Commonwealth of Massachusetts other than any provision of Massachusetts law that would result in the application of the laws of any jurisdiction other than The Commonwealth of Massachusetts. This Assignment may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.
