Assignment

Whereas, George Auther Spencer, an individual, residing at 2437 FM 3242, Milano, Texas 76556, U.S.A. ("Assignor"), has invented certain new and useful improvements in the patents listed in Schedule A attached hereto (the "Patents"); and

Whereas, GSK Technologies, Inc., a Texas corporation, located at 1615 W. Brown St., Wylie, Texas 75098 ("Assignee"), is desirous of acquiring the entire right, title, and interest in the Patents.

Now, Therefore, for other good and valuable consideration, Assignor, by these presents does hereby sell, assign, and transfer unto Assignee, its successors, assigns, and legal representatives the full and exclusive right to the Patents in the United States and the entire right, title, and interest in and to all divisions, reissues, substitutions, continuations, continuations-in-part, and extensions of said Patents, or parent applications thereof. Assignor hereby authorizes and requests the Commissioner of Patents and Trademarks to issue all such patents that may result therefrom, insofar as Assignor's interests are concerned, to Assignee, of the entire right, title, and interest in and to the same, for his sole use and benefit; and for the use and benefit of his legal representatives, to the full end of the term for which said patent(s) may be granted, as fully and entirely as the same would have been held by the Assignor had this assignment not been made.

Assignor also sells and assigns to Assignee, its successors, assigns and legal representatives the full and exclusive right, title, and interest to the inventions disclosed in said Patents throughout the world, including the right to file applications and obtain patents, utility models, industrial models, and designs therefore in the Assignee's own name throughout the world, including all rights of priority, all rights to publish cautionary notices reserving ownership of the inventions and Patents and all rights to register the inventions and Patents in appropriate registries, all foreign rights arising from pre-grant publication of applications for patent based on the inventions; and Assignor further agrees to execute any and all powers of attorney, applications, assignments, declarations, affidavits, and any other papers in connection therewith necessary to perfect such right, title and interest in Assignee, its successors, assigns and legal representatives.

Assignor further agrees to communicate to Assignee, its successors, assigns and/or legal representatives, any known facts respecting any improvements, and, at the expense of Assignee, to testify in any legal proceedings, sign all lawful papers, execute all divisional, continuation, continuation-in-part, reissue and substitute applications, make all lawful oaths, and generally do everything possible to vest title in Assignee and to aid Assignee, its successors, assigns and legal representatives to obtain and enforce proper protection for the Patents in all countries.
