Assignment of Invention and Patent Application

Trevis Mayfield ("Assignor") is inventor of a tool holding system ("Invention") which is shown in U.S. Patent Application # 29,206,004 (the "Application"). Raymond Maloney ("Assignee"), an individual having a mailing address of 320 W. Hwy. 54, La Harpe, KS 66751, desires to acquire all rights in and to the Application as well as to any patents that may be issued for the Invention.

Therefore, for valuable consideration, the receipt of which is acknowledged, Assignor assigns to Assignee 51% of his right, title, and interest in the Invention and the Application (as well as such rights in any divisions, continuations in whole or part, substitute applications or other patent applications for the Invention) to Assignee for the entire term of the issued patent and any reissues or extensions that may be granted and for the entire terms of any and all foreign patents that may issue from foreign applications (as well as divisions, continuations in whole or part, or substitute applications) filed claiming the benefit of the Patent Application and any priority rights resulting from the Patent Application.

Assignor authorizes the United States Patent and Trademark Office to issue any patent resulting from the Patent Application to Assignee according to the percentage interest indicated in this assignment. The right, title, and interest is to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made.

Assignor further agrees to: (a) cooperate with Assignee in the prosecution of the Application and foreign counterparts; (b) execute, verify, acknowledge, and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain the Patent for the invention in any and all countries.

Trevis L Mayfield
