ASSIGNMENT OF APPLICATIONDocket Number SIIPT04

Whereas Security Innovation, Inc., a Florida corporation, of 1318 S. Babcock Street, Melbourne, Florida 32901, herein referred to as "Assignee", has purchased from the Florida Institute of Technology the rights to an invention entitled METHOD AND APPARATUS FOR PREEMPTIVE MONITORING OF SOFTWARE BINARIES BY INSTRUCTION INTERCEPTION AND DYNAMIC RECOMPILATION, for which an application for a United States Patent was filed on March 17, 2003, Application Serial Number 10/390,397 (the Patent Application"); and

Whereas the purchase referenced above was formalized in a purchase agreement between Assignee and Florida Institute of Technology on September 24, 2004 (the "Purchase Agreement"); and

Whereas an assignment was previously recorded on November 7, 2005 in the United States Patent and Trademark Office at reel 016984, frames 0238-0240, which erroneously identified the purchaser of the Patent Application as SI Government Solutions, Inc., herein referred to as Assignor; and

Whereas Assignor and Assignee are desirous of correcting the chain of title to show that the entire right, title, and interest in the invention and the Patent Application are owned by Assignee;

Now therefore, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Assignor sells, assigns, and transfers to Assignee the full and exclusive right to said invention in the United States, and the entire right, title, and interest in and to the Patent Application, and the entire right, title, and interest in and to any and all patents that may be granted therefor in the United States. Assignor further authorizes and requests the Director of Patents and Trademarks to issue any said United States patents to Assignee, for Assignee's exclusive benefit, to the full end of the term for which any said patents may be granted, as fully and entirely as the same would have been held by Assignor if this assignment and sale had not been made.

ASSIGNMENT, Page 2 of 2**10/390.397**

Further, Assignor sells, assigns, and transfers to Assignee the full and exclusive right to said invention in any foreign country or region in which Assignor has similar rights to those held in the United States, whether by international treaty or otherwise, and the entire right, title, and interest in and to any and all related or counterpart patent applications and patents that may be granted therefor in any said foreign country or region. Assignor further authorizes and requests the respective foreign patent authority to issue any said patents to Assignee, for Assignee's exclusive benefit, to the full end of the term for which any said patents may be granted, as fully and entirely as the same would have been held by Assignor if this assignment and sale had not been made.

The effective date of this Assignment shall be September 24, 2004, the date of the Purchase Agreement. The parties agree that the effect of this Assignment is to continue the chain of title from the assignment recorded on November 7, 2005 as of that recordation date, to reflect Assignee's status as owner of the entire right, title, and interest to the Patent Application as set forth herein as the immediate successor from the Florida Institute of Technology.
