PATENT ASSIGNMENT

PATENT ASSIGNMENT dated as of September 18, 2006 (the "Effective Date") between Walker Stainless Equipment Company, Inc., a Delaware corporation ("Assignor"), and Carlisle Process Systems, Inc., a Delaware corporation ("Assignee").

WHEREAS Assignor desires to assign to Assignee and Assignee desires to acquire all of Assignor's right, title and interest in and to those patents and patent applications owned by Assignor which are listed on Exhibit A hereto (collectively "Assigned Patents").

NOW, THEREFORE, for US\$1.00, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Assignor and Assignee agree as follows:

1. Assignor hereby sells, assigns and transfers to Assignee, its successors, assigns and legal representatives, the entire right, title and interest in and to the Assigned Patents and any and all inventions described and/or claimed therein and any and all patents and like rights of exclusion (including extensions thereof) of any country which may be granted on or for said inventions or on any counterpart, divisional, continuing, reissue, re-examination, extension, provisional or other patent application based on and/or claiming priority to any of said Assigned Patents, the same to be held and enjoyed by the Assignee for its own use and benefit, and for the use and benefit of its successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this assignment had not been made, together with all causes of action (in law or equity), claims, demands and any other rights for, or arising from an past, present or future infringement of the Assigned Patents, along with the right to sue for and collect any damages for its own use and benefit, and for the use and benefit of its successors, assigns or other legal representatives.

2. Assignor authorizes and requests the Commissioner of Patents and Trademarks of the United States, and any official of any country or countries foreign to the United States, whose duty it is to register patents, to record Assignee as the assignee and owner of the Assigned Patents.

3. Assignor and Assignee agree that each shall execute such documents and take such further actions as may be reasonably required or desirable to carry out the provisions hereof and give effect to the assignments contemplated under this Patent Assignment. From time to time after the date of this Assignment, Assignee may prepare documents and take actions reasonably necessary to further the assignment of the Assigned Patents to Assignee hereunder. Such documents shall be in recordable form based on the local law requirements, if applicable.
