PATENT ASSIGNMENT

This Patent Assignment is entered into by and between International Paper Company, a New York corporation having a place of business located at 6400 Poplar Avenue, Memphis, Tennessee 38197 ("Assignor") and Arizona Chemical Company, a Delaware corporation having a place of business located at 4600 Touchton Road East, Suite 500, Jacksonville, Florida 32246 ("Assignee").

WHEREAS, Assignee is a wholly-owned subsidiary of Assignor; and

WHEREAS, Assignee's employees, officers and agents, have from time-to-time invented certain inventions related to Assignee's products/services and have applied for patent protection therefor;

WHEREAS, certain patent applications were inadvertently assigned to Assignor, rather than to Assignee, by the inventors thereof through mistake and without deceptive intent;

WHEREAS, certain other patent applications were acquired by Assignor for Assignee's benefit, but Assignee failed to record a proper transfer of title thereto with the US Patent and Trademark Office; and,

WHEREAS Assignee and Assignor wish to place all patent applications in the name of Assignee, to own for itself, as though the patent applications had been assigned to Assignee directly.

NOW, THEREFORE, in consideration of good and valuable consideration, the receipt of which is hereby acknowledged, Assignor and Assignee agree as follows:

The term "PATENT APPLICATIONS" as used herein shall mean those patent applications identified in Schedule A, attached hereto and incorporated herein by reference.

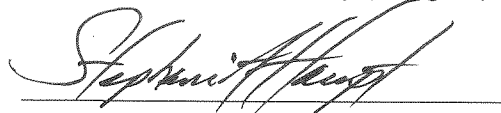

Assignor does hereby sell, assign, transfer and convey unto Assignee, its successors and assigns, the entire right, title and interest in and to the PATENT APPLICATIONS, the subject matter thereof, and any patent granted therefrom in any country of the world, including any continuation, divisional, reissue, reexamination or extension thereof, and including the right to sue and recover for past infringements thereof.

Assignor hereby represents that it is the owner of the PATENT APPLICATIONS and of the inventions thereof and that it has the full right to convey all right, title and interest in and to said PATENT APPLICATIONS; that it has not executed any writing or agreement in conflict herewith; and, that it agrees to execute any further documents which Assignee may reasonably require to perfect Assignee's interest in the PATENT APPLICATIONS hereby conveyed.
