ASSIGNMENT

WHEREAS, Kenneth Dolenak, an individual located at 335 Science Drive, Moorpark, California 93021 (hereinafter "Assignor"), has invented a new and useful GLOVE WITH ENHANCED CUFF for which an application for Design Patent has been executed by him; and

WHEREAS, Assignor believes himself to be the original, first, and sole inventor of the invention as disclosed and claimed in the United States Application for Design Patent filed on December 20, 2005, serial number 29/245,254, for a GLOVE WITH ENHANCED CUFF; and

WHEREAS, RINGERS RESOURCE, INC., a California corporation, having a place of business at 335 Science Drive, Moorpark, California 93021 (hereinafter "Assignee"), desires to acquire by formal, recordable assignment the entire right, title, and interest in and to the invention, the application, and any Design Patent that might be granted for the invention in the United States and throughout the world;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor has sold, assigned, and transferred, and by these presents does hereby sell, assign, and transfer, unto Assignee, the entire right, title, and interest in and to the invention, the application, and any Design Patent that might be granted for the invention in the United States and throughout the world, including the right to file foreign applications directly in the name of Assignee and to claim for any such foreign applications any priority rights to which such applications are entitled under international conventions, treaties or otherwise.

Further, Assignor agrees that, upon request and without further compensation, but at no expense to Assignor, he and his legal representatives and assigns will perform all lawful acts, including the execution of papers and the giving of testimony, that might be necessary or desirable for obtaining, sustaining, reissuing or enforcing Design Patent in the United States and throughout the world for the invention, and for perfecting, recording or maintaining the title of Assignee, his successors and assigns, to the invention, the application, and any Design Patent granted for the invention in the United States and throughout the world. In addition, Assignor does hereby make, constitute and appoint Assignee, or any officer or agent of Assignee, as Assignor's true and lawful attorney-in-fact, with power of substitution, to enforce every such contract, permit, license, claim, demand or right, with respect to the Assigned Patent, and to do any and all things necessary to be done

as fully and effectually as Assignor might or could do, and hereby ratifies all that said attorney-in-fact shall lawfully do or cause to be done by virtue hereof. This power of attorney shall be irrevocable.

Assignor represents and warrants that he has not granted and will not grant to others any rights inconsistent with the rights granted by this Assignment. Assignor further represents and warrants that he does not know of any improvements to the invention, other than what has been disclosed in the application and/or has been communicated to the patent attorney(s) prosecuting said application. Assignor has not filed any other patents relating in any way to the Assigned Patent and agrees not to do so other than in his role as an employee of the Assignee.

Assignor authorizes and requests the Commissioner of Patents and Trademarks of the United States and of all foreign countries to issue any Design Patent granted for the invention, whether on the application or on any subsequently filed division, continuation, continuation-in-part, or reissue application, to Assignee, or his successors or assigns, as the assignee of the entire interest in the invention.

IN WITNESS WHEREOF, Assignor has executed this Assignment.
