## PATENT ASSIGNMENT

**WHEREAS**, Intel Corporation, a Delaware corporation with an office located at 2200 Mission College Boulevard, Santa Clara, CA 95054 ("Assignor"), and Marvell Technology Group Ltd., a Bermuda corporation, have entered into an Asset Purchase Agreement dated June 26, 2006 (the "Asset Purchase Agreement") and a Patent License Agreement dated June 26, 2006 and amended November 8, 2006 (the "Patent License Agreement"); and,

**WHEREAS**, Assignor owns U.S. Patent Number 6,639,827 (the "Additional Patent") as provided in Schedule A hereto; and

**WHEREAS**, Assignor has agreed, inter alia, to grant, or cause to be granted, as the case may be, to Marvell International Ltd., a Bermuda corporation ("Assignee"), all of Assignor's right, title and interest in and to the Additional Patent, subject to any licenses retained by or granted to Assignor pursuant to the Patent License Agreement, and subject to licenses existing as of the date hereof, and Assignee desires to acquire such entire right, title and interest in and to the Additional Patent, subject to such licenses.

**NOW, THEREFORE**, in consideration of the foregoing and the sum of One Dollar (\$1.00), and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, subject to any licenses retained by or granted to Assignor pursuant to the Patent License Agreement, and subject to licenses existing as of the date hereof, Assignor does hereby irrevocably sell, assign, convey and transfer unto Assignee, its successors and assigns, the entire right, title and interest in and to the Additional Patent including, without limitation, the right to sue for and recover damages for any past, present or future infringement of such Additional Patent, the same to be held and enjoyed by Assignee for its own use, and for its legal representatives and assigns, to the full end of the term for which patents are granted, as fully and entirely as the same would have been held by Assignor had this assignment and sale not been made.

The Additional Patent is sold AS-IS with no warranties or representations by Assignor of any kind or nature, including but not limited to, as to the validity, enforceability, usefulness or utility thereof with respect to any party. Assignee hereby acknowledges and agrees that the Additional Patent is taken by Assignee AS-IS and pursuant to Assignee's own due diligence. Assignee further acknowledges and agrees that in purchasing the Additional Patent, Assignee has not relied and is not relying on any statements made by Assignor or present or former Assignor employee(s) regarding the validity, enforceability, usefulness, or utility of the Additional Patent.

The Additional Patent is subject to licenses that are entered into between Assignor and third parties prior to the execution of this Patent Assignment Agreement. Assignee acknowledges and hereby agrees that it takes the Additional Patent subject to these existing licenses. Assignor has not been and is under no obligation to identify the third parties to Assignee.

The Additional Patent may be continuations, divisionals, or continuations-in-part of other patent applications or issued patents; have pending or issued continuations, divisionals or continuations-in-part; and/or, have related foreign equivalents (collectively, the "Related

Assets"). Nothing in this Agreement shall be construed to transfer title to or grant a license under the Related Assets to Assignee.

Assignor hereby authorizes and requests the Commissioner of Patents and Trademarks of the United States, and any officer of any country or countries foreign to the United States, whose duty it is to issue patents or other evidence or forms of intellectual property protection or applications as aforesaid, to issue the same to Assignee and its successors, assigns and other legal representatives in accordance with the terms of this instrument.

Assignor agrees to execute, at Assignee's expense, any further papers and to do such other acts as may be reasonably necessary and proper, or otherwise required to vest full title in and to the Additional Patent in Assignee.
