This INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT (the "**Assignment**") is made and entered into as of March 14, 2007, by and between Cypress Semiconductor Corporation, a Delaware corporation ("**Assignor**") and Sensata Technologies, Inc., a Delaware corporation ("**Assignee**"). Each capitalized term used but not defined herein shall have the meaning ascribed to such term in that Asset Purchase Agreement, dated as of February 27, 2007, between Assignor and Assignee (the "**Purchase Agreement**").

### RECITALS

A. Assignor and Assignee are parties to the Purchase Agreement, pursuant to which Assignor has agreed to sell, transfer and assign to Assignee, and Assignee has agreed to accept and assume from Assignor, the Transferred Assets, including certain patents and patent applications.

B. This Assignment is entered into in connection with Assignor's issuance of a Bill of Sale in order to provide to Assignee a recordable instrument and to supplement and perfect the transfer of certain patents and patent applications.

### AGREEMENT

For good and valuable consideration set forth in the Purchase Agreement, the receipt and sufficiency of which are hereby acknowledged:

1. Assignor does hereby irrevocably sell, assign, transfer, convey, set over, and deliver, and cause its Subsidiaries irrevocably to sell, assign, transfer, convey, set over, and deliver to Assignee, in perpetuity and throughout the world, Assignor's entire right, title, and interest in and to any and all of (i) the patents and patent applications listed on Schedule A to this Assignment, and all rights in any renewals, extensions, continuations, continuations-in-part, reissues, re-examinations, divisions, substitutes or equivalents thereof, based on any of such patents and patent applications, in the United States and all foreign countries (collectively, the "Intellectual Property").

2. Assignor shall execute or cause to be delivered to Assignee such instruments and other documents, and shall take such other reasonable actions at Assignee's expense, as Assignee may reasonably request after the Closing Date, for the purpose of carrying out, evidencing, vesting or perfecting the assignment of the Intellectual Property pursuant to this Assignment.

3. This Assignment shall be governed by and construed and enforced in accordance with the applicable laws of the state of California without regard to any principles governing conflicts of laws.

4. This Assignment may be executed in multiple counterparts, each of which shall be deemed to be an original and all of which together shall be deemed to be one and the same instrument.
