(c) in any and all inventions described in the patent application listed above in part (a), and in any and all forms of intellectual and industrial property protection derivable from such patent application, and that are derivable from any and all continuing applications, reissues, extensions, renewals, and examinations of such patent application, including, without limitation, patents, applications, utility models, inventor's certificates, and designs together with the right to file applications therefor; and including (1) full ownership and title to US patent applications and US Patents therefor, and (2) the right to claim the same priority rights in the United States, from any previously filed applications, such as Japanese patent application Ser.
