PATENT ASSIGNMENT

THIS PATENT ASSIGNMENT ("Agreement"), dated as of September 14, 2007, is made by and between MINCO MANUFACTURING, INC., a Colorado corporation ("Assignor"), and MINCO MANUFACTURING ACQUISITION, LLC, a Delaware limited liability company ("Assignee"). For good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

1. Assignor hereby irrevocably assigns and transfers to Assignee all of Assignor's right, title, and interest in, to, and under the issued patents and patent applications set forth in *Schedule A* hereto (collectively, the "Patents"), and the inventions and improvements described and claimed therein (the "Inventions"), together with all: (a) reissues, divisionals, continuations, renewals, substitutions, extensions and continuations-in-part, foreign and international counterparts of the foregoing, and any other patents and applications claiming priority from the foregoing; (b) enhancements and improvements to the foregoing developed by Assignor; (c) all income, royalties, damages and payments now or hereafter due or payable, including without limitation, damages and payments for past, present and future infringements of the foregoing; (d) the right to sue for past, present and future infringements of the foregoing; and (e) all other rights corresponding, incidental or relating to the foregoing.
2. At the request and expense of Assignee, Assignor agrees to: (a) execute, acknowledge and deliver assignments of the Patents and Inventions on appropriate forms to satisfy any requirements as may be prescribed by the applicable agency or authority or, in the absence of any requirements, as may be appropriate under the circumstances; and (b) take all other actions as may be necessary, advisable and appropriate to implement, register, perfect or otherwise notify all appropriate governmental agencies and authorities of the assignment contained in this Agreement; and (c) cooperate with and reasonably assist Assignee (i) in the preparation and prosecution of any applications, reissues, divisionals, continuations, renewals, substitutions, extensions and continuations-in-part covering the Patents and Inventions, and (ii) in the prosecution or defense of any interferences, infringement suits, or other proceedings that may arise in connection with any of the Patents and Inventions, including without limitation, testifying as to any facts relating to the Patents and Inventions assigned in this Agreement.
3. This Agreement will be governed and construed in accordance with the laws of the State of Colorado, without regard to the conflicts of law principles of such State. Any proceeding or other legal action arising out of or relating to this Agreement or the enforcement of any provision of this Agreement will be brought or otherwise commenced in any state or federal court located in El Paso County, Colorado.
4. If any provision of this Agreement is found invalid or unenforceable, in whole or in part, the remaining provisions and partially enforceable provisions will, nevertheless, be binding and enforceable.
5. Failure by either party to exercise any of its rights hereunder shall not constitute or be deemed a waiver or forfeiture of such rights.

EXECUTION VERSION

6. The provisions hereof shall inure to the benefit of, and be binding upon, the successors, assigns, heirs, executors and administrators of the parties hereto.

7. This Agreement may be signed in one or more counterparts, each of which shall be deemed an original, and all of which shall constitute one instrument.
