ASSIGNMENT OF PATENTS

ASSIGNMENT OF PATENTS (the "Assignment") made as of _____, 2007 by **MAGUS Intellectual Property GmbH**, a Swiss limited liability company having a principal place of business at Grabenstrasse 42, 6001 Zug, Switzerland ("Assignor") to **Lamb Assembly and Test, LLC**, a Delaware limited liability company having a principal place of business at 60 East 42nd Street, New York, NY 10165 ("Assignee").

WHEREAS, Assignor is the sole and exclusive owner of certain patents (including utility patents, design patents, plant patents and process patents) and patent applications set forth on Schedule I hereto and incorporated by reference herein together with any patent disclosures and inventions (whether or not reduced to practice) (together with any other patents and patent applications which Assignor has the right to acquire on the date of this Assignment which is directly relevant to Assignee's business, the "Assigned Patents"); and

WHEREAS, Assignee desires to purchase or acquire all Assignor's right, title and interest in and to such Assigned Patents;

NOW, THEREFORE, in recognition of good and valuable consideration (including, but not limited to, that described in any letter agreement between Assignor and Assignee), dated on or about the date hereof, given by the Assignee to the Assignor for the transfer of the Assigned Patents, the receipt and sufficiency of which is hereby acknowledged, Assignor and Assignee agree as follows:

Assignor does hereby sell, transfer, convey, assign and deliver to Assignee all right, title and interest of Assignor in and to the Assigned Patents, including without limitation the right to make, to use, to sell and to offer for sale the inventions of the Assigned Patents throughout the United States and Europe, and any divisions, continuations, continuations-in-part, and renewals thereof and foreign counterparts thereof, free and clear of all liens or encumbrances other than the lien in favor of Intermec Inc.; all rights to apply for registration in foreign countries with full benefit of such priority as may now or hereafter be granted to it by law, treaty or other international convention; and all rights, interests, claims and demands recoverable in law or equity, that Assignor has or may have in profits and damages for past, present and future infringements of the Assigned Patents, including, without limitation, the right to compromise, sue for and collect such profits and damages; all of the foregoing to be held and enjoyed by Assignee, its successors and assigns or their legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment had not been made.

At any time after date of this Assignment, Assignor hereby agrees that Assignor shall and shall cause its affiliates and related parties to, from time to time, execute and

deliver to Assignee such additional instruments, documents, conveyances or assurances and take such other action as shall be necessary, or otherwise reasonably be requested by Assignee, to confirm and assure the rights and obligations provided for in this Assignment and render effective the consummation of the transactions contemplated hereby, or otherwise to carry out the intent and purposes of this Assignment.

This Assignment shall be governed by, and construed in accordance with, the laws of the United States, in respect to patent issues and in all other respects, including as to the validity of this Assignment, its interpretation and effect, by the laws of the State of New York, without giving effect to the conflict of laws rules thereof.
