PATENT ASSIGNMENT

PATENT ASSIGNMENT dated as of November 2nd, 2007 (the "Effective Date") between American International Materials, Ltd., an Illinois Corporation ("ASSIGNOR") having a principal place of business at 3221 West 127th Street, Blue Island, Illinois 60406, and Terence J. Fellabaum, a Wisconsin resident ("ASSIGNEE") having his residence at W305N5270 Gail Lane, Hartland, Wisconsin 53209.

ASSIGNOR has agreed to assign to ASSIGNEE its entire right, title and interest in and to the United States patents and patent applications set forth on Schedule A attached hereto, (collectively, the "Patents") and all of the inventions described and claimed therein, including the right to apply for and obtain U.S. and foreign patent on said inventions;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, ASSIGNOR hereby sells, assigns and transfers to ASSIGNEE, its successors, assigns and legal representatives, the entire right, title and interest in and to said Patents and any and all inventions described and/or claimed therein and any and all Patents and like rights of exclusion (including extension thereof) of any country which may be granted on or for said inventions or on any counterpart, divisional, continuing, reissue or other patent application based on said Patents, the same to be held and enjoyed by the ASSIGNEE for its own use and benefit, and for the use and benefit of its successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by ASSIGNOR if this assignment had not been made, together with all claims for damages for or reason of past, present or future infringement of said Patents or said inventions or misuse or theft of any of said inventions and the right to sue for and collect such damages for its own use and benefit, and for the use and benefit of its successors, assigns or other legal representatives.

ASSIGNOR further covenants that it has the full right to convey to ASSIGNEE the entire right, title and interest in, to and under said Patents and inventions, including the right to apply for, obtain and maintain Patents in any country thereon, and further that ASSIGNOR will not execute any agreement in conflict therewith.

ASSIGNOR hereby authorizes the ASSIGNEE, its successors, assigns or other legal representatives to apply in its or their own name or names for patents and like rights of exclusion on or for said inventions or any of them or any part thereof in all countries, or if they so desire the priority of the filing date under the provisions of any foreign Convention and all such other treaties of like purpose.

ASSIGNOR hereby agrees for itself, its successors, assigns and other legal representatives, promptly upon request of the ASSIGNEE, its successors, assigns or other legal representatives, to execute and deliver, or have executed and delivered, with further

compensation any power of attorney, assignment, or other lawful documents and any further assurances that may be deemed necessary by the ASSIGNEE, its successors, assigns or other legal representatives, fully to secure to ASSIGNEE and its successors, assigns or other legal representatives, the entire right, title and interest as aforesaid in and to the said Patents and said inventions and any and all U.S. and foreign patents and like rights of exclusion that have been or may be granted in and to or under said Patents and said inventions.

ASSIGNOR authorizes and requests the Commissioner of Patents and Trademarks of the United States, and any official of any country or countries foreign to the United States, whose duty it is to register patents, to record ASSIGNEE as the assignee and owner of the Patents.

IN WITNESS WHEREOF, the undersigned have caused this Assignment to be signed and executed by the undersigned thereunto duly authorized as of the date first above written.
