Assignment and Agreement

I, Jonathan N. Betts-LaCroix of Chatsworth, California, have worked on safety systems for power equipment invented by Stephen F. Gass in connection with my work for Kinetic Equipoise Corporation of Chatsworth, California. In the course of that work I may have invented subject matter forming part of one or more of the patent applications listed below. I have assigned and hereby assign to SD3, LLC of Wilsonville, Oregon, any and all right, title and interest that I have to the patent applications listed below, to all inventions disclosed in those applications, to all patents issuing from, claiming benefit of, or claiming priority to those applications, and to all applications and patents continuing at least in part from one or more of those applications. I agree to sign any and all documents required for SD3 to perfect and prosecute the patent applications listed below, to file and prosecute any and all related future patent applications, and to establish SD3's ownership of such applications and any resulting patents. I further agree not to use or disclose the contents of my work described above and/or any such patent applications without the prior written consent of SD3. I acknowledge having received payment and/or other good and sufficient consideration for this Assignment and Agreement.

The assignments granted in this document are subject to the conditions listed on Attachment A, which attachment is incorporated herein by reference.

Attachment A

The assignments under this agreement are granted only if, and as long as, the following are true:

- (1) all patents and patent applications containing synchronous quadrature detector electronics substantially similar to those described in the references at the bottom of this sheet, bear (or are officially amended to bear) Jonathan Betts-LaCroix as an inventor, and
- (2) no patents or patent applications claim any synchronous quadrature detector electronics substantially similar to those described in the references at the bottom of this sheet, except as part of a safety system for power equipment.

References:

- (1) PCT application entitled "Safety Systems for Power Equipment."
- (2) US provisional patent application entitled "Contact Detection System for Power Equipment."
