ASSIGNMENT OF PATENTS AND DISCLOSURES

This Assignment of Patents and Disclosures entirely replaces and supercedes the assignment contained in that certain earlier agreement entitled "Assignment of Patents and Disclosures and License Agreement" executed by and between the same parties on March 27, 2001, a copy of which is attached hereto for reference.

In consideration of the payment by ASSIGNEE to ASSIGNOR of the sum of Ten Dollars (\$10.00), the receipt of which is hereby acknowledged and for other good and valuable consideration, **Pennzoil-Quaker State Company**, a Delaware corporation, having a place of business at 700 Milam, Houston, Texas 77002, (hereinafter referred to as ASSIGNOR) hereby sells, assigns and transfers to **Penreco**, a Texas general partnership, having a place of business at 910 Louisiana, Houston, Texas 77002, (hereinafter referred to as ASSIGNEE), and the successors, assigns and legal representatives of the ASSIGNEE the entire right, title and interest for the United States and the Territories thereof and all foreign countries, including all priority rights under any International Convention, in and to any and all improvements which are disclosed in the disclosures, U.S. applications, provisional applications and related disclosures including any corresponding applications or any continuation, continued prosecution application, continuation-in-part, division, renewal, request for continued examination, or substitute thereof, and reissue or re-examination thereof listed in Schedule A and Schedule B, attached hereto and made a part hereof.

ASSIGNOR hereby covenants that no assignment, sale, agreement or encumbrance has been or will be made or entered into which would conflict with this assignment.

ASSIGNOR further covenants that ASSIGNEE will, upon its request, be provided promptly with all pertinent facts and documents relating to said invention and said Letters Patent and legal equivalents as may be known and accessible to ASSIGNOR and will testify as to the same in any interference, litigation or proceeding related thereto and will promptly execute and deliver to assignee or its legal representatives any and all papers, instruments or affidavits required to apply for, obtain, maintain, issue and enforce said application, said invention and said Letters Patent and said equivalents thereof which may be necessary or desirable to carry out the purposes thereof.

This Assignment is conditioned upon ASSIGNEE advising ASSIGNOR in writing of any intent to dedicate to the public, or drop a patent or patent application based on such disclosures or applications. ASSIGNOR shall have thirty (30) days to advise ASSIGNEE that ASSIGNOR wishes to acquire ownership and pay all necessary costs to acquire/maintain such disclosures or applications. In such event, ASSIGNEE shall retain a perpetual world-wide, irrevocable, royalty-free right and license to use such property in any business in which ASSIGNEE has a bona fide equitable interest, including joint ventures and partnerships where ASSIGNEE is not a majority owner and is not the operator.

IN WITNESS WHEREOF, I have hereunto set hand and seal this 7th day of April, 2003.
